ABOUT US

Polyhose is an Indian based multinational diversified industrial conglomerate focused on design, development, manufacturing and distribution of fluid conveyance product. Our manufacturing plants are the most modern with state of art facilities and the required skilled expertise to deliver premium quality, reliable, high performing product.

Polyhose had a humble beginning in the year 1996, but within a span of just two decades it has established a global imprint with operations in North America, Europe, Middle East, South East Asia and today engages more than 1500 employees in its worldwide operation with an aspiration to make Polyhose the most preferred brand in the international market.

Polyhose state of art manufacturing facilities are accredited with ISO 9001-2008 & TS16949 as well EMS Certified operations, managed by skilled and talented Managers from the Industry, building competitive advantage through robust processes and implementing operational excellence in each area of operations to deliver world class POLYHOSE Branded products.

Polyhose, today a world class manufacturer of Thermoplastic, Rubber Hydraulic, PTFE and Industrial hose with an annual capacity of 100 million meters.

Our Scale of economy will benefit both International and Indian customer and we sincerely request customers to enjoy the benefits of Quality – Cost- Service by Patronizing POLYHOSE Brand.

Polyhose looks forward to increases association with dynamic organisations in search of new development in the field of Industrial, Automobile, Hydraulic and Pneumatic applications with the aim to establish cost effective and high quality hoses for hydraulic power transmission.

POLYHOSE IS COMMITTED TO

- On-time delivery of high performance products meeting customer requirements.
- Redefining polymer engineering.
- Deliver quality excellence exceeding international standards.
- Collaborative, long term partnerships with strategic customers.
- Global Presence and Support.

Our mantra to success is to redefining **Innovation**, redefining **Customer Support** and redefining **Polymer Engineering**

CERTIFICATE

Polyhose India (Rubber) Pvt. Ltd.
Plot No. F37- F43 & F50-F55,
SIPCOT Industrial Park, Irungattukottai, Pannalur Post
Sriperumbudur Taluk - 602117, Kanchipuram District,
Tamil Nadu, INDIA

has established and applies
a Quality Management System for

Design, Manufacture and Sales of
Braided and Spiral Rubber Hoses, Industrial rubber hoses,
composite hoses and hose assemblies

ISO 9001:2008

STATEMENT OF
CONFORMITY

We hereby declare that the Quality System of:

Polyhose India Pvt. Ltd.

for manufacture and testing of

Thermoplastic/PTFE Hoses
(Type: PH/EF 140, PH/EF 145 & PH/EF 179 series)

as specified in the following pages, is found to comply with the requirements
applicable to it.

The manufacturer's Quality System for the components has been assessed with
respect to conformity with Annex I Chapter 3 in the Pressure Equipment Directive,
2014/68/EU.

Further details are given in the following pages

THERMOPLASTIC PRODUCT RANGE

INDEX

PH 253 - R1AT / 1 SN

Applicable Standard : SAEJ517-100R1AT / EN 853-1SN / ISO 1436

Construction

Core — Black colour, Synthetic rubber resistant to oil and water

Reinforcement — Single steel wire braid

Cover — Black colour, Synthetic rubber resistant to abrasion and weather, oil & ozone

Application — Medium Pressure Hydraulic Lines 10 to 250 bar. For use with petroleum, synthetic or water based fluids in Hydraulic systems. Suitable for Agricultural, Earthmoving & Material handling equipments and machineries/systems

Note: Use Item Code PH553 for low temp (-55°C to + 100°C);
PH255 for high temp MSHA Cover (-40°C to +135°C); PH291 for ultra high temp MSHA Cover (-40°C to +150°C)
PH298 for UHMWPE cover; Sizes 2-1/2" to 4" are not covered under SAEJ517-100R1AT/EN 853-1SN

PH 254 - R2 AT / 2SN

Applicable Standard : SAE J517-100 R2AT / EN 853-2SN / ISO 1436

Construction

Core — Black colour, Synthetic rubber resistant to oil and water

Reinforcement — Double steel wire braids

Cover — Black colour, Synthetic rubber resistant to abrasion and weather, oil & ozone

Application — High Pressure Hydraulic Lines 50 to 415 bar. For use with petroleum, synthetic or water based fluids in Hydraulic systems. Suitable for Agricultural, Earthmoving & Material handling equipments and machineries/systems

Note: Use Item Code PH554 for low temp (-55°C to +100°C) ; PH256 for high temp MSHA Cover (-40°C to +135°C);
PH292 for ultra high temp (-40°C to +150°C); PH299 for UHMWPE cover;
3" & 4" are not covered under SAEJ517-100R1AT/EN 853

PH 176 - TRIFLEX

Polyhose Proprietary Product

Construction

Core	Black colour, synthetic rubber resistant to oil
Reinforcement	Three high tensile steel braids
Cover	Black colour, Synthetic rubber resistant to abrasion and weather, oil & ozone
Application	High Pressure for forest industry. Compatible with mineral, vegetable oils, glycol, polyglycol based, synthetic ester based oils, oils in water emulsion

Item Code	Dash Size	DN	ID		RI OD		OD		WP		BP		BR/r		W

Temperature Range: Continuous: -40°C to +100°C

PH 257 - 1SC

Applicable Standard : EN 857 - 1SC / ISO 11237-1

Construction

Core	Black colour, synthetic rubber resistant to oil & water
Reinforcement	Single steel wire braid
Cover	Black colour, Synthetic rubber resistant to abrasion and weather, oil & ozone
Application	Medium Pressure Hydraulic Lines 75 to 225 bar requiring compact outer dia, and high flexibility for use with petroleum, synthetic or water based fluids in Hydraulic systems. Suitable for Agricultural, Construction & Material handling equipments and machineries/systems

Note: Use Item Code PH167 for high temp (-40°C to + 135°C); PH557 for low temp (-55°C to + 100°C); PH169 for ultra high temp (-40°C to + 150°C); PH157 for non MSHA cover (-40°C to + 100°C); 1-1/4" 1SC not covered under EN 857

Core Black colour, synthetic rubber resistant to oil & water

Reinforcement Double steel wire braids

Cover Black colour, Synthetic rubber resistant to abrasion and weather, oil & ozone

Application Constant pressure hydraulic lines 345 bar for use with petroleum, synthetic or water based fluids in hydraulic systems. Suitable for agricultural, construction & material handling equipments/systems

Temperature Range: Continuous: -40°C to +100°C Intermittent: +120°C

PH 296 - 1SNX - HP

Applicable Standard : Exceeds EN 857

Construction

Core — Black colour, Synthetic rubber resistant to oil and water

Reinforcement — Single steel wire braid

Cover — Black colour, Synthetic rubber resistant to abrasion and weather, oil & ozone

Application — Medium Pressure Hydraulic Lines 110 to 290 bar and requires compact outer dia, and high flexibility for use with petroleum, synthetic or water based fluids in Hydraulic systems. Suitable for Agricultural, Construction & Material handling equipments and machineries/systems

PH 145 – HYDRAULIC OIL S & D HOSE

Applicable Standard : SAE J517 - 100 R4

Construction

Core	Black colour, synthetic rubber resistant to oil
Reinforcement	Synthetic Yarn fabric with Steel Wire Helix
Cover	Black colour, Synthetic rubber resistant to abrasion and weather, oil & ozone
Application	For suction return line of Hydraulic Oil in Industrial and Earthmoving Equipments

Note: 1.3/4" not covered under SAE 100 R4

PH 146 - R5

Applicable Standard : SAE J517 - 100 R5

Construction

Core — Black colour, Synthetic rubber resistant to oil and water

Reinforcement — Single steel wire braid

Cover — Black Colour, single braid of textile fiber

Application — Medium Pressure Hydraulic Lines 25 to 210 bar for use with fluids in Hydraulic systems can also be used in air and water. Suitable for Agricultural, Earthmoving & Material handling equipments and machineries/systems

1

Note: Use Item Code PH141 for rubber cover; 2", 2-1/2", 3" are not covered under SAE 100R5

Temperature Range: Continuous: -40°C to +100°C

PH 161 - 1TE

Applicable Standard : EN 854 - 1TE

Construction

Core Black colour, Synthetic rubber resistant to oil and water

Reinforcement Single Textile Braid

Cover Black colour, Synthetic rubber resistant to abrasion and weather, oil & ozone

Application Very low pressure hydraulic lines 15 to 25 bar for use with petroleum, synthetic or water based fluids in Hydraulic systems. Suitable for Agricultural, Stationary equipments and hydraulic systems

Note: Use Item Code PH261 for MSHA Cover; PH171 for high temp (-40°C to +135°C); PH271 for high temp MSHA Cover (-40°C to +135°C); 3/4" not covered under EN 854

PH 513 - PW 3K - 1 WB

Polyhose Proprietary Product

Construction

Core Black colour, Synthetic rubber resistant to hot water

Reinforcement Single steel wire braid

Cover Black colour, Synthetic rubber resistant to abrasion and weather, oil & ozone

Application For pressure washer applications with a maximum pressure of 210 Bar. For cold and hot water up to 155 °C

Note: Also Available in Blue and Grey colour Covers on request, Not suitable for steam and oil applications

Impulse cycles: 400,000 cycles

PH 278 - 4SH

Applicable Standard : EN 856 - 4SH / ISO 3862

Construction

Core Black colour, Synthetic rubber resistant to oil and water

Reinforcement Four high tensile steel wire spirals

Cover Black colour, Synthetic rubber resistant to abrasion and weather, oil & ozone

Application Extra high pressure Hydraulic Lines 250 to 420 bar and hydrostatic transmission lines for use with petroleum, synthetic or water based fluids in Hydraulic systems. Suitable for Earthmoving & Material handling equipments and machineries/systems

PH 174 - BCS

Applicable Standard : BCS 174 - 1992

Construction

Core Black colour, Synthetic rubber resistant to oil and water

Reinforcement Double high tensile steel wire braids

Cover Black colour, Synthetic rubber resistant to abrasion and weather, oil & ozone

Application High Pressure Hydraulic Lines 115 to 450 bar for use with petroleum, synthetic or water based fluids in Hydraulic systems. Specially made as per British coal 174 specification and to be used in underground mining equipments machines and roof support systems. Also, in long wall mining applications

Note: 5/8" not covered under BCS 174. DGMS approved

PH 531 - FUEL HOSE

Applicable Standard : SAE J 30 R2 TYPE 2

Construction

Core — Black colour, Synthetic rubber resistant to oil and fuel

Reinforcement — Textile reinforcement

Cover — Black Colour, Synthetic rubber resistant to oil, ozone

Application — Low Pressure coupled and uncoupled low-permeation Fuel hose for Automotive and allied application, Physical, Extrac table and fuel permeation properties as specified in SAE J 30 - R2 - Type 2 standard for use with gasoline, diesel fuel, lubrication oil, or the vapour present in either fuel system or in crank case of internalcombustion engines

AUTOMOBILE & AIR CONDITIONING

PH 140 - LOW SMOKE HI-TEMP BRAKE HOSE

Polyhose Proprietary Product

Construction

Core Black colour, AEM rubber with low smoke property

Reinforcement Double textile braids

Cover Black colour, AEM rubber with low smoke property

Application Very low pressure hydraulic lines 15 bar for use with Hydrocarbon lubricants, hydraulic fluids and wide range temperature resistance

Temperature Range: Continuous: -38°C to +150°C

PH 503 / 134 A NON- BARRIER TYPE AIR CONDITIONING HOSE

Applicable Standard : SAE J 2064 Type B

Construction

Core Black colour, Synthetic Rubber resistant to R134a with PEG oil

Reinforcement Single Steel Wire Braid

Cover Black Colour, Synthetic rubber resistant to weather

Application Car, Truck and Agricultural Machine Air Conditioning System Recommended Fluids: Freon R 134a and PEG lubricant oils

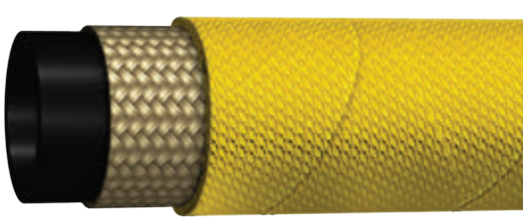
RUBBER - INDUSTRIAL HOSE



PH 440 - COMPRESSED AIR WIRE BRAIDED HOSE

Polyhose Proprietary Product

Construction

Core	Black colour, Synthetic rubber resistant to air
Reinforcement	Single steel wire braid
Cover	Yellow colour, Synthetic rubber resistant to water. Also available in Black cover on request
Application	Compressed air service in severe working conditions in mines, quarries and industrial applications

Note: 1/2" to 2" - one wire braid, 21/2" to 4" - two wire braided. Use part number PH441 for high temperature

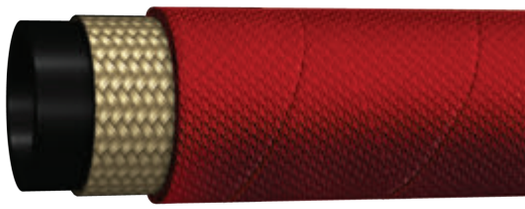
PH 471 - STEAM 1 W/B

Applicable Standard : IS 10655 Type 2 / BS 5342



Construction

Core Black colour, EPDM rubber resistant to high temperature steam
Reinforcement Single steel wire Braid
Cover Red Colour, EPDM rubber resistant to abrasion, heat and weather
Application High temperature steam Lines at constant pressure of 145 psi

Note: Black Colour Cover also available

PH 475 - STEAM HOSE WITH HELICAL WIRE

Polyhose Proprietary Product

Construction

Core	Black colour, EPDM rubber resistant to high temperature steam
Reinforcement	Double steel wire braids with helical wire
Cover	Red Colour, EPDM rubber resistant to heat and weather
Application	Hardwall hose with steel cord reinforcement for steam at a maximum working pressure of 20 bar, used in chemical industries and industrial application in general , where a particular bending radius is necessary

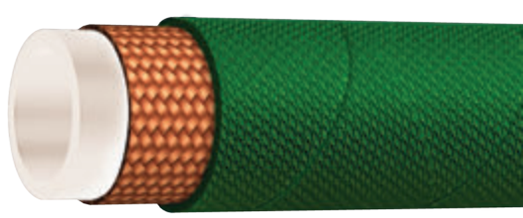
Temperature Range: Continuous: -40°C to +210°C Steam

PH 555 - NON CONDUCTIVE CARBON FREE HOSE

Polyhose Proprietary Product



Construction

Core	Cream colour, Synthetic rubber
Reinforcement	High Tensile Fiber Yarn Braid
Cover	Red or Green Colour, Synthetic Rubber Cover resistant to oil, weather and abrasion
Application	Electrical Coolant application; Conveying coolants in Furnace, specially designed for Low Leakage Current, leakage current levels less than 15 Micro Amps at 5000V DC

PH 601 - WATER SUCTION & DISCHARGE HOSE W.P. 10 BAR

Polyhose Proprietary Product

Construction

Core Black colour, Synthetic rubber resistant to water

Reinforcement Plies of synthetic cords with helix wire

Cover Black colour, Synthetic rubber, wrapped type, abrasion water resistant

Application Mandrel built heavy duty suction and discharge hose for handling of water, inert fluid, sewerages and waste water, where optimum flexibility is required

PH 606 - STEEL MILL WATER DELIVERY HOSE WITH FIBER GLASS COVER

Polyhose Proprietary Product

Construction

Core	White colour, EPDM Rubber resistant to hot water
Reinforcement	High tensile synthetic textile cord
Cover	Fiber glass cloth cover
Application	Water Delivery Hose for application in Steel Mills and Glass industries. The Fiber Glass cover resists occasional contact of molten particles and protection against flame

Item Code	Dash Size	ID		OD		WP		BP		W

PH 610 - WATER DISCHARGE HOSE - W.P. 20 BAR

Polyhose Proprietary Product

Construction

Core	Black colour, Synthetic rubber resistant to water
Reinforcement	Plies of synthetic textile cords
Cover	Black colour, Synthetic rubber, wrapped type, abrasion water resistant
Application	Light weight rubber collapsible hose design for water, natural liquid fertilizers, waste water, for submerged pump and irrigation system

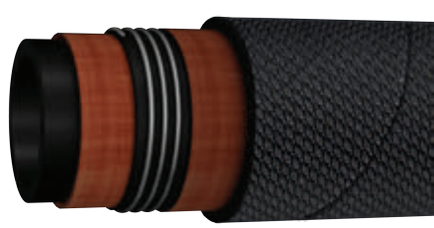
PH 611 - OIL / FUEL SUCTION & DISCHARGE HOSE W.P. 10 BAR

Polyhose Proprietary Product



Construction

Core	Black colour, Synthetic rubber resistant to oil
Reinforcement	Plies of synthetic textile cords with steel helix and two cross anti static copper wire
Cover	Black colour, Synthetic rubber resistant to oil, ozone and abrasion
Application	Mandrel built heavy duty oil suction and discharge hose for handling grades of gasoline or petroleum oils of aromatic content upto 50% from tank truck, in dispensing station etc, during winter/summer seasons and withstands full vacuum

PH 624 - SHOT BLASTING HOSE W.P. 12 BAR

Polyhose Proprietary Product

Construction

Core Black colour, Synthetic and natural rubber blend resistant to abrasion

Reinforcement High Tensile Synthetic Textile Cord with 2 cross anti static wire

Cover Black colour, Synthetic rubber resistant to ozone, weather and abrasion

Application Suitably designed long lasting heavy duty hose for use in sand, metal grits and foundry waste with conductive rubber compound to ensure static electricity dissipation abrasion loss of the tube according to ISO 4649: 50±5mm³

PH 625 - BUNKER TRUCK HOT AIR BLOWER HOSE W.P. 10 BAR

Polyhose Proprietary Product

Construction

Core Black colour, Synthetic rubber to withstand high temperature blower air

Reinforcement High Tensile Synthetic Textile Cord

Cover Black colour, Synthetic rubber resistant to ozone, weather and abrasion

Application For Hot dry oilness air feeding to bunker trucks for discharge of bulk material like Dry Cement, Fly Ash, Quary Dust, Sand, etc., in construction industry

PH 626 - DRY CEMENT DELIVERY / SILO HOSE

Polyhose Proprietary Product

Construction	
Core	Black colour, Synthetic and natural rubber blend resistant to abrasion
Reinforcement	Synthetic textile cord yarn fabric with antistatic copper wire
Cover	Black colour, Synthetic rubber resistant to ozone, weather and abrasion
Application	For transfer of Dry Cement, Sand, Crusher Dust from Silo/ Tanker

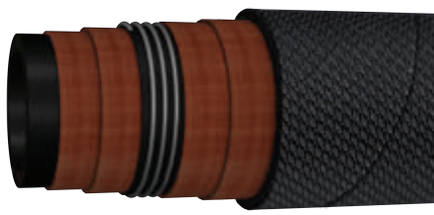
PH 628 - ABRASIVE BULK MATERIAL SUCTION AND DISCHARGE HOSE W.P 20 BAR

Polyhose Proprietary Product



Construction	
Core	Black colour, Synthetic and natural rubber blend resistant to abrasion
Reinforcement	High Tensile Synthetic Textile Cord with steel helix and 2 cross anti static wire
Cover	Black colour, Synthetic rubber resistant to ozone, weather and abrasion
Application	For suction and discharge of bulk material Dry Cement, Gravel, Sand in Construction Industry

PH 629 - ABRASIVE BULK MATERIAL DISCHARGE HOSE W.P 10 BAR

Polyhose Proprietary Product

Construction

Core Black colour, Synthetic and natural rubber blend resistant to abrasion

Reinforcement High tensile synthetic textile cord and two cross anti static copper wire

Cover Black colour, Synthetic rubber resistant to ozone, weather and abrasion

Application For discharge of bulk material Dry Cement, Gravel, Sand etc., in Construction Industry

PH 630 - AIR & WATER DISCHARGE HOSE - 20 BAR

Polyhose Proprietary Product

Construction

Core Black colour, Synthetic rubber resistant to water

Reinforcement Plies of synthetic textile cords with helix wire

Cover Black colour, Synthetic rubber, wrapped type, abrasion water resistant

Application Hose designed for Air, water & stone dust delivery in underground mines

Item Code	Dash Size	ID		OD		WP		BP		W

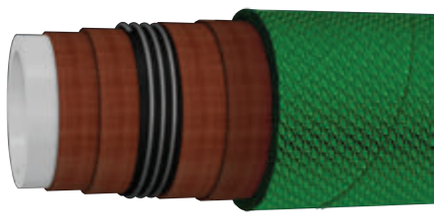
PH 642 - XLPE CHEMICAL SUCTION AND DISCHARGE HOSE W.P. 17 BAR

Polyhose Proprietary Product



Construction	
Core	White colour, Synthetic rubber with XLPE liner
Reinforcement	High Tensile Synthetic Textile Cord with steel helix and 2 cross anti static wire
Cover	Green colour EPDM, wrapped type, abrasion and weather resistant
Application	Excellent in handling petroleum based products, hydrocarbon solvents, oxidising chemicals, major strong acid and alkali as well as organic fluid etc.,

PH 657 - OIL FUEL DELIVERY HOSE FRAS - 20 BAR

Polyhose Proprietary Product

Construction

Core	Black colour, Conductive Synthetic Rubber resistant to oil
Reinforcement	Piles of synthetic textile cords
Cover	Black colour, Conductive Synthetic rubber resistant to weather and abrasion
Application	Mandrel built heavy duty oil delivery hose for handling a wide range of gasoline or petroleum oils of aromatic content up to 50% from tank truck, in dispensing station, refineries, etc.

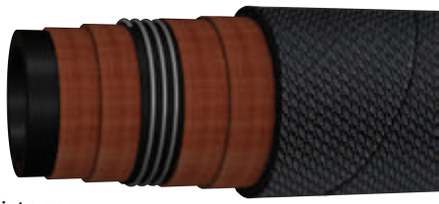
PH 661 - MINE BLAST HANDLING HOSE - W.P. 20 BAR

Polyhose Proprietary Product



Construction

Core	Black colour, Conductive synthetic rubber abrasion resistance
Reinforcement	Plies of synthetic textile cord with steel helix
Cover	Black colour, Conductive Synthetic rubber resistant to abrasion, Ozone and fire resistance
Application	Mandrel built heavy duty Suction & Discharge hose for handling explosive materials in Mining applications

Item Code	Dash Size	ID		OD		WP		BP		V	W
		inch	mm	inch	mm	psi	bar	psi	bar	bar	kg/m

Temperature Range: Continuous: -30°C to +80°C

PH 663 - AIR & WATER DISCHARGE HOSE FRAS - 20 BAR

Polyhose Proprietary Product

Construction

Core	Black colour, Conductive synthetic rubber resistant to air and water
Reinforcement	Piles of synthetic textile cord
Cover	Black colour, Conductive Synthetic rubber resistant to air and water
Application	Hose designed for Air, water & stone dust delivery in underground mines

Item Code	Dash Size	ID		OD		WP		BP		W

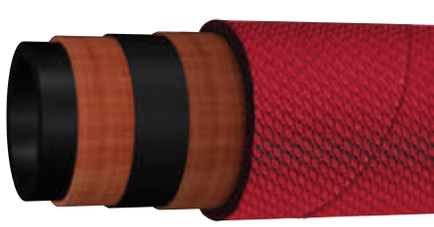
PH 681 - SATURATED STEAM & HOT WATER HOSE

Polyhose Proprietary Product



Construction

Core	Black colour, EPDM rubber resistant to saturated steam
Reinforcement	Synthetic Textile cord
Cover	Red colour,EPDM resistant to ozone and weather
Application	Saturated steam and hot water delivery

Item Code	Dash Size	ID		OD		WP		BP		W

Temperature Range: Continuous: -40°C to +165°C

PH148 - MEDIUM PRESSURE HYDRAULIC HOSE - R7

Applicable Standard: SAE 100 R7 / DIN EN ISO 3949

Construction	
Core	Thermoplastic Elastomer
Reinforcement	Single Braid of Synthetic Fiber
Cover	Polyurethane, Black Colour, Pin pricked
Application	Medium Pressure Hydraulic Lines 70 to 210 bar. Suitable for hydraulic application with increased resistance to abrasion for use with petroleum,synthetic or water based fluids in Hydraulic systems. Suitable for Agricultural machinery, Earthmoving, Articulating & Telescopic booms and Material handling equipments. Can be used for industrial gases and other applications

Note: Available Twin & Multi lines with different Hose combination and Size. Also special colours available on request.
Please specify our part nos. as PH151 for electrical non - conductive application - Orange colour cover

PH149 - HIGH PRESSURE HYDRAULIC HOSE - R8

Applicable Standard: SAE 100 R8 / DIN EN ISO 3949

Construction	
Core	Thermoplastic Elastomer
Reinforcement	One or more Braids of Aramid Fiber
Cover	Polyurethane, Black Colour, Pin pricked
Application	High Pressure Hydraulic Lines 100 to 420 bar compact, high pressure, light weight and low change in length. Suitable for hydraulic application with increased resistance to abrasion for use with petroleum, synthetic or water based fluids in Hydraulic systems. Suitable for Agricultural machinery, Earthmoving, Safety, Rescue and Material handling equipments Can be used for industrial gases and other applications. Please consult manufacturer

Note: Available Twin & Multi lines with different Hose combination and Size. Also special colours available on request.
Please specify our part nos. as PH152 for electrical non - conductive application - Orange colour cover

PH353 - HIGH PRESSURE HYDRAULIC HOSE - R8 (2PB)

Applicable Standard: SAE 100 R8 / DIN EN ISO 3949

Construction	
Core	Thermoplastic Elastomer
Reinforcement	Double Braids of Synthetic Fiber
Cover	Polyurethane, Black Colour, Pin pricked
Application	High Pressure Hydraulic Lines 140 to 350 bar high pressure, light weight and low change in length. Suitable for hydraulic application with increased resistance to abrasion for use with petroleum, synthetic or water based fluids in Hydraulic systems. Suitable for Agricultural machinery, Earthmoving, Safety, Rescue and Material handling equipments. Can be used for industrial gases and other applications. Please consult manufacturer

Note: Available Twin & Multi lines with different Hose combination and Size. Also special colours available on request.

PH194 -LOW TEMPERATURE - R18

Applicable Standard: Exceeds SAE 100 R18 / DIN EN ISO 3949

Construction	
Core	Thermoplastic Elastomer
Reinforcement	One or more Braids of Synthetic Fiber
Cover	Special Polyester Elastomer, Black Colour, Pin pricked.
Application	Constant Pressure Hydraulic Lines 210bar. Suitable for hydraulic application with low temperature requirements and abrasion resistance for use with petroleum, synthetic or water based fluids in hydraulic systems. Suitable for agricultural machinery, earthmoving, cold storage material handling equipments and systems. Can be used for industrial gases and other applications. Please consult manufacturer

Note: Available Twin & Multi lines with different Hose combination and Size. Also special colours available on request.
Please specify our part nos. as PH195 for electrical non - conductive application - Orange colour cover

PH348 - MEDIUM PRESSURE HYDRAULIC HOSE - 1WB

Applicable Standard: Polyhose Proprietary Product and Exceeds SAE / EN One wire braid hose specification

Construction	
Core	Thermoplastic Elastomer
Reinforcement	Single Braid of Steel Wire
Cover	Polyurethane, Black Colour, Pin pricked (Optional)
Application	Medium Pressure Hydraulic Lines 100 to 350 bar. Suitable for hydraulic application with increased resistance to abrasion for use with petroleum, synthetic or water based fluids in Hydraulic systems. Suitable for Agricultural machinery, Earthmoving, Articulating & Telescopic booms and Material handling equipments. Can be used for industrial gases and other applications. Please consult manufacturer. Compact Construction compared to conventional single steel wire braid rubber hoses

Note: Available Twin & Multi lines with different Hose combination and Size. Also special colours available on request

PH358 - R7 COMPACT HOSE

Polyhose Proprietary Product

Construction

Core Polyamide (Composite tube)

Reinforcement One or more Braids of Synthetic Fiber

Cover Polyurethane, Black Colour, Pin pricked

Application Medium Pressure Hydraulic Lines 70 to 210 bar. Suitable for hydraulic application with increased resistance to abrasion for use with petroleum,synthetic or water based fluids in Hydraulic systems. Suitable for Agricultural machinery,Earthmoving, Articulating & Telescopic booms and Material handling equipments

Note: Available Twin & Multi lines with different Hose combination and size. Also special colours available on request

PH761 - HYBRID HOSE - 1W

Applicable Standard: Polyhose Proprietary Product and Exceeds SAE / EN One wire braid hose specification

Construction

Core Thermoplastic Elastomer

Reinforcement Single Braid of Steel Wire

Cover Synthetic Rubber, Black Colour

Application Medium Pressure Hydraulic Lines 88 to 225 bar. For use with petroleum, synthetic or water based fluids in Hydraulic systems. Suitable for Agricultural machinery, Earthmoving, material handling euipments and machineries / systems

Temperature Range: Continuous: -40°C to +100°C Temp. not to exceed +70°C for Air and Water based fluids

PH762 - HYBRID HOSE - 2W

Applicable Standard: Polyhose Proprietary Product and Exceeds SAE / EN two wire braid hose specification

Construction

Core Thermoplastic Elastomer

Reinforcement Two Braids of Steel Wire

Cover Synthetic Rubber, Black Colour

Application High Pressure Hydraulic Lines 165 to 400 bar. For use with petroleum, synthetic or water based fluids in Hydraulic systems. Suitable for Agricultural machinery, Earthmoving, material handling euipments and machineries / systems

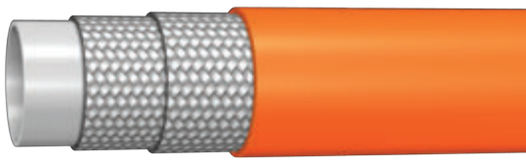
PH301 - SEWER JET - 2500 PSI

Polyhose Proprietary Product



Construction

Core	Thermoplastic Elastomer
Reinforcement	One or more Braids of Synthetic Fiber
Cover	Polyurethane, Orange Colour
Application	Standard Sewer cleaning vehicles and cleaning equipments. Special construction for optimum cut and wear resistance with bonded tube and cover. Available in long lengths with a special cover resistant to microbiological degradation light weight compared to conventional rubber alternatives and increased lifetime

Note: Special colours available on request

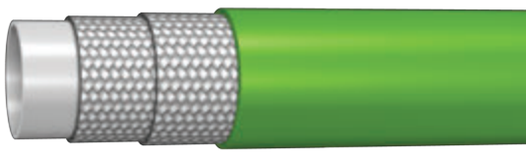
PH303 - SEWER JET - 3600 PSI

Polyhose Proprietary Product



Construction

Core	Thermoplastic Elastomer
Reinforcement	Two or more Braids of Synthetic Fiber
Cover	Polyurethane, Green Colour
Application	Compact Sewer cleaning vehicles and lateral sewer line equipments. Heavy duty construction for optimum cut and wear resistance with bonded tube and cover. Available in long lengths with a special cover, resistant to microbiological degradation. High pressure performance and flexible hose for cleaning smaller sized sewer ducts

Note: Special colours available on request

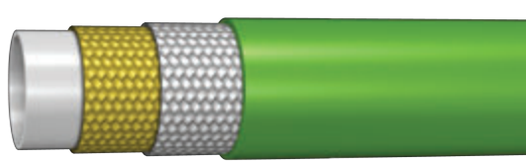
PH304 - SEWER JET - 4000 PSI

Polyhose Proprietary Product



Construction

Core	Thermoplastic Elastomer
Reinforcement	One or more Braids of Aramid Fiber and one braid of synthetic fiber
Cover	Polyurethane, Green Colour
Application	Particularly suitable for use with compact vehicles and lateral sewer line cleaning equipment. High pressure capability combined with high safety factor, flexibility and small profile. Abrasion and cut resistant cover designed for long life. Ideal for use in small pipes and ducts. Bonded construction to resist kinking. Available in long lengths

Note: Special colours available on request

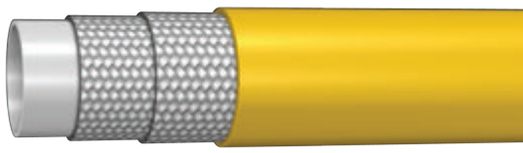
PH305 - SEWER JET - 2800 PSI

Polyhose Proprietary Product



Construction

Core — Thermoplastic Elastomer

Reinforcement — One Braid of Synthetic Fiber and one special braid of synthetic fiber armoring

Cover — Polyurethane, Yellow Colour

Application — Ideal for those tough jobs with tight bends. Abrasion and cut resistant cover. Bonded construction to resist kinking. Design includes "armoring", enhancing flexibility and wear life. Cover material specially compounded to resist microbiological degradation. Available in long lengths

Note: Special colours available on request

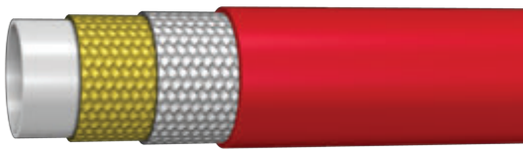
PH308 - SEWER JET - 3600 / 4000 PSI

Polyhose Proprietary Product



Construction

Core — Special Polyurethane

Reinforcement — One or more braids of Aramid Fiber and one special braid of synthetic fiber armoring

Cover — Polyurethane, Red Colour

Application — Extreme flexibility at low temperature owing to special inner tube material and light weight reinforcement. Bonded construction to resist kinking. Resists cuts, abrasion and microbiological degradation. Available in long lengths

Note: Special colours available on request

PH342 - PAINT SPRAY - 1W

Polyhose Proprietary Product

Construction	
Core	Polyamide
Reinforcement	Single braid of steel wire
Cover	Polyurethane, Blue Colour, Pin pricking (Optional)
Application	Airless paint spray systems for 100 to 350 bar. Suitable for applications requiring chemical resistance to solvents and aggressive fluids. Due to low permeation value of polyamide, the hose is also suitable for industrial gases

Note: Available Twin & Multi lines with different Hose combination and Size; WP at 1:2.5 ratio also available

PH 344 / PH 345 - HIGH PRESSURE PAINT SPRAY

Polyhose Proprietary Product

Construction	
Core	Polyamide
Reinforcement	One or more braids of Synthetic Fiber with anti-static polymeric layer
Cover	Polyurethane, Blue Colour
Application	Airless paint spray systems for 228 to 360 bar. Suitable for applications requiring chemical resistance to solvents and aggressive fluids. Specially suitable for pulsating electric piston pumps

Note: Factory made hose assemblies of PH344-4 available with UL mark. Approval can be seen @www.ul.com;

PH341 - PAINT & AGGRESSIVE CHEMICAL SPRAY - 1W

Polyhose Proprietary Product

Construction

Core — PTFE (Polytetrafluoroethylene)

Reinforcement — Single Braid of steel wire

Cover — Polyurethane, Blue Colour, Pin pricked

Application — Airless paint spray systems for 200 to 350 bar. Suitable for applications requiring chemical resistance to solvents and aggressive fluids. Specially suitable for moisture cure adhesives and two components chemicals transfer

Note: Special colours available on request

PH340 - PAINT & AGGRESSIVE CHEMICAL SPRAY - 2W

Applicable Standard: Polyhose proprietary product and exceeds SAE/EN two wire braid hose specifications

Construction	
Core	PTFE (Polytetrafluoroethylene)
Reinforcement	Double steel wire Braids
Cover	Polyurethane, Black Colour, Pin pricked (Optional)
Application	High Pressure Hydraulic Lines 150 to 450 bar,Compact, high pressure, Light weight and low change in length. Suitable for hydraulic application with increased resistance to abrasion for use with petroleum, synthetic or water based fluids in Hydraulic systems. Suitable for Agricultural machinery,Earthmoving, safety, rescue and material handling equipments. Can be used for industrial gases and other applications. Please consult manufacturer. Compact construction compared to conventional double steel wire braid rubber hoses

Note: Special colours available on request

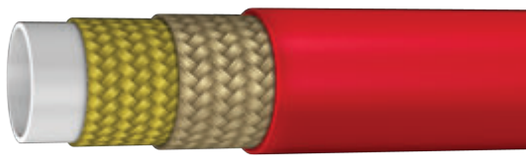
PH350 / PH351 - VERY HIGH PRESSURE JACK HOSE

Polyhose Proprietary Product



Construction

Core — Thermoplastic Elastomer

Reinforcement — PH350 - Double braids of steel wire. PH351 - One or more braids of aramid fiber with one braid of steel wire.

Cover — Polyurethane, Red Orange Colour

Application — Very High Pressure hydraulic lines 300 to 700 bar compact, high pressure, light weight, high abrasion resistance and low change in length for use with petroleum, synthetic or water based fliud in hydraulic systems. Mainly used for rescue, safety equipments, bolt tensioning tools and jacking & re-railing equipments also, suitable for earthmoving and material handling equipments

Note: Available Twin & Multi lines with different Hose combination and size. Also special colours available on request

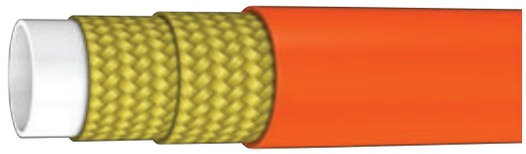
PH352 - VERY HIGH PRESSURE JACK HOSE - NON CONDUCTIVE

Polyhose Proprietary Product



Construction

Core — Thermoplastic Elastomer

Reinforcement — Two or more braids of aramid fiber

Cover — Polyurethane, Orange Colour

Application — Non conductive Hydraulic Lines 700 bar, Compact, high pressure, light weight, high abrasion resistance and low change in length for use with petroleum, synthetic or water based fluids in Hydraulic systems. Mainly used for rescue, safety equipments, bolt tensioning tools and jacking & re-railing equipments. Mainly used in applications requiring High electrical insulation or non-conductivity

Note: Available Twin & Multi lines with different Hose combination and size

PH751 - COMPACT JACK HOSE

Polyhose Proprietary Product

Construction

Core — Thermoplastic Elastomer

Reinforcement — One or more Braids of Aramid Fiber with one braid of steel wire

Cover — Polyurethane, Black Colour

Application — Very High Pressure Hydraulic Lines 1034 bar,Compact, high pressure, Light weight, high abrasion resistance and low change in length for use with petroleum, synthetic or water based fluids in Hydraulic systems mainly used for Rescue & Safety equipments,torque and tension tools, jacking and re-railing equipments, high pressure pump. Also,suitable for earthmoving and material handling equipments

PH320 / PH321 / PH322 - LUBRICATION GREASE HOSE

Polyhose Proprietary Product

Construction	
Core	Thermoplastic Elastomer
Reinforcement	PH320 & PH321: One or more braids of synthetic fiber PH322: One or more braids of Aramid Fiber
Cover	Polyurethane, Black Colour
Application	High pressure mini Hydraulic Lines 300 to 400 bar. Suitable for hydraulic application with increased resistance to abrasion for use with petroleum,synthetic or water based fluids Specifically designed for diverse greasing and lubrication applications of industrial, hand held or automatic (centralized) grease distribution equipments

Note: Please contact for different working pressure and dimensions

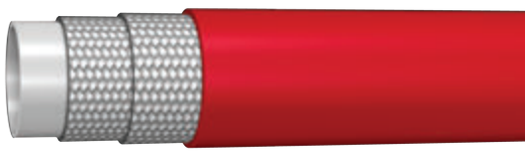
PH324 -ELECTRICALLY CONDUCTIVE COMPRESSED NATURAL GAS HOSE

Applicable Standard: Conforms to NFPA 52



Construction

Core — Nylon

Reinforcement — Two or more Braids of Synthetic fiber with electrically conductive layer

Cover — Polyurethane, Red Colour, Pin pricked

Application — Refueling hose specially designed for conveying compressed natural gas. Dissipates static build-up

Vaccum Rating : 28 inch Hg

Special Feature : Twin and multi-lines available

Note: Wire spring guard must be used on ANSI/CSA design certified CNG dispencer fill hose assemblies.
Special colours available on request

PH334 - REFRIGERATION HOSE

Polyhose Proprietary Product

Construction

Core	Polyamide / Polyester elastomer
Reinforcement	Single braid of synthetic fiber
Cover	Polyester Elastomer / Polyurethane, Black Colour, Pin Pricked
Application	Specially designed to replace capillary copper tubes in industrial refrigeration Lines 42 to 52 bar High savings and cost effective vis a vis copper tube better vibration dampening property compared to copper tube

Note: Special colours available on request

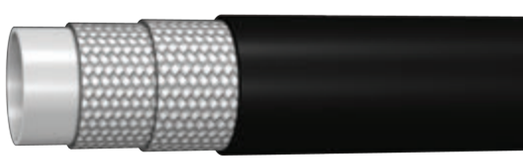
PH326 / PH327 / PH328 - BEVERAGE DISPENSING HOSE

Polyhose Proprietary Product



Construction

Core	Thermoplastic Elastomer food quality and FDA approved
Reinforcement	PH326 Single or double braid of synthetic fiber PH327 Single braid of steel wire PH328 Single braid of aramid fiber
Cover	Polyurethane, Black Colour, Pin Pricked
Application	High pressure beverage dispensing lines 210 to 420 bar Specifically designed for gases, also gas mixtures used in fixed and mobile beverage dispensing units.Special tube material flavour free eliminates contamination risks and conforms to FDA and EC regulations. Please contact for different dimensions and working pressure

Note: Grey Colour Cover also available

PH354 / PH355 - MICRO BORE

Polyhose Proprietary Product

Construction	
Core	Thermoplastic Elastomer
Reinforcement	PH354 - Single braid of synthetic fiber PH355 - Single braid of Aramid fiber
Cover	Polyurethane, Black Colour, Pin pricked upon request
Application	Very high pressure mini Hydraulic Lines 250 to 630 bar Suitable for hydraulic application , with increased resistance to abrasion for use with petroleum,synthetic or water based fluids in Hydraulic systems pressure test equipments and test points, general mini hydraulic equipments,Automotive roof and boot opening system and truck's cab lifting systems

Note: Available with polyamide 12 as core and cover

Item Code	DN	ID		OD		WP		BP		BR/r		W

Temperature Range: Continuous: -40°C to +100°C Temp. not to exceed +70°C for Air and Water based fluids

THERMOPLASTIC - INDUSTRIAL- PILOT LINE

PH392 - PILOT LINE HOSE

Polyhose Proprietary Product

Construction	
Core	Oil and Water resistant thermoplastic elastomer
Reinforcement	Single braid of synthetic fiber
Cover	Special thermoplastic elastomer resistant to oil, weather and abrasion , Black colour, Pin Pricked
Application	Specially designed for servo control pilot Lines 120 bar and requires very high flexibility Superior finish on cover surface to have a gliding effect on the other lines that are clustered together and very minimal outer cover damages Also, suitable for medium pressure and return lines for use with petroleum, synthetic or water based fluids in Hydraulic systems Suitable for Agricultural, Construction & Material handling equipments and machineries/systems

Note: Available twin & multi lines with different hose combination and size. Also, special colours available on request

PH758 - MOISTURE BLOK HOSE

Polyhose Proprietary Product

Construction

Core	Polyolefin
Reinforcement	Double braids of Synthetic Fiber
Cover	Polyurethane ,Blue Colour, Pin Pricked
Application	Conveying urethane foam components, Moisture sensitive chemicals

Note: Available Twin & Multi lines with different Hose combination and Size. Also special colours available on request

PH771 - CAB TILT HOSE

Polyhose Proprietary Product

Construction

Core	Thermoplastic Elastomer
Reinforcement	One Braid of Aramid Fiber with one braid of synthetic fiber
Cover	Polyurethane, Black Colour
Application	Cabin tilt application

Note: On request products are available for high temperature application with special cover

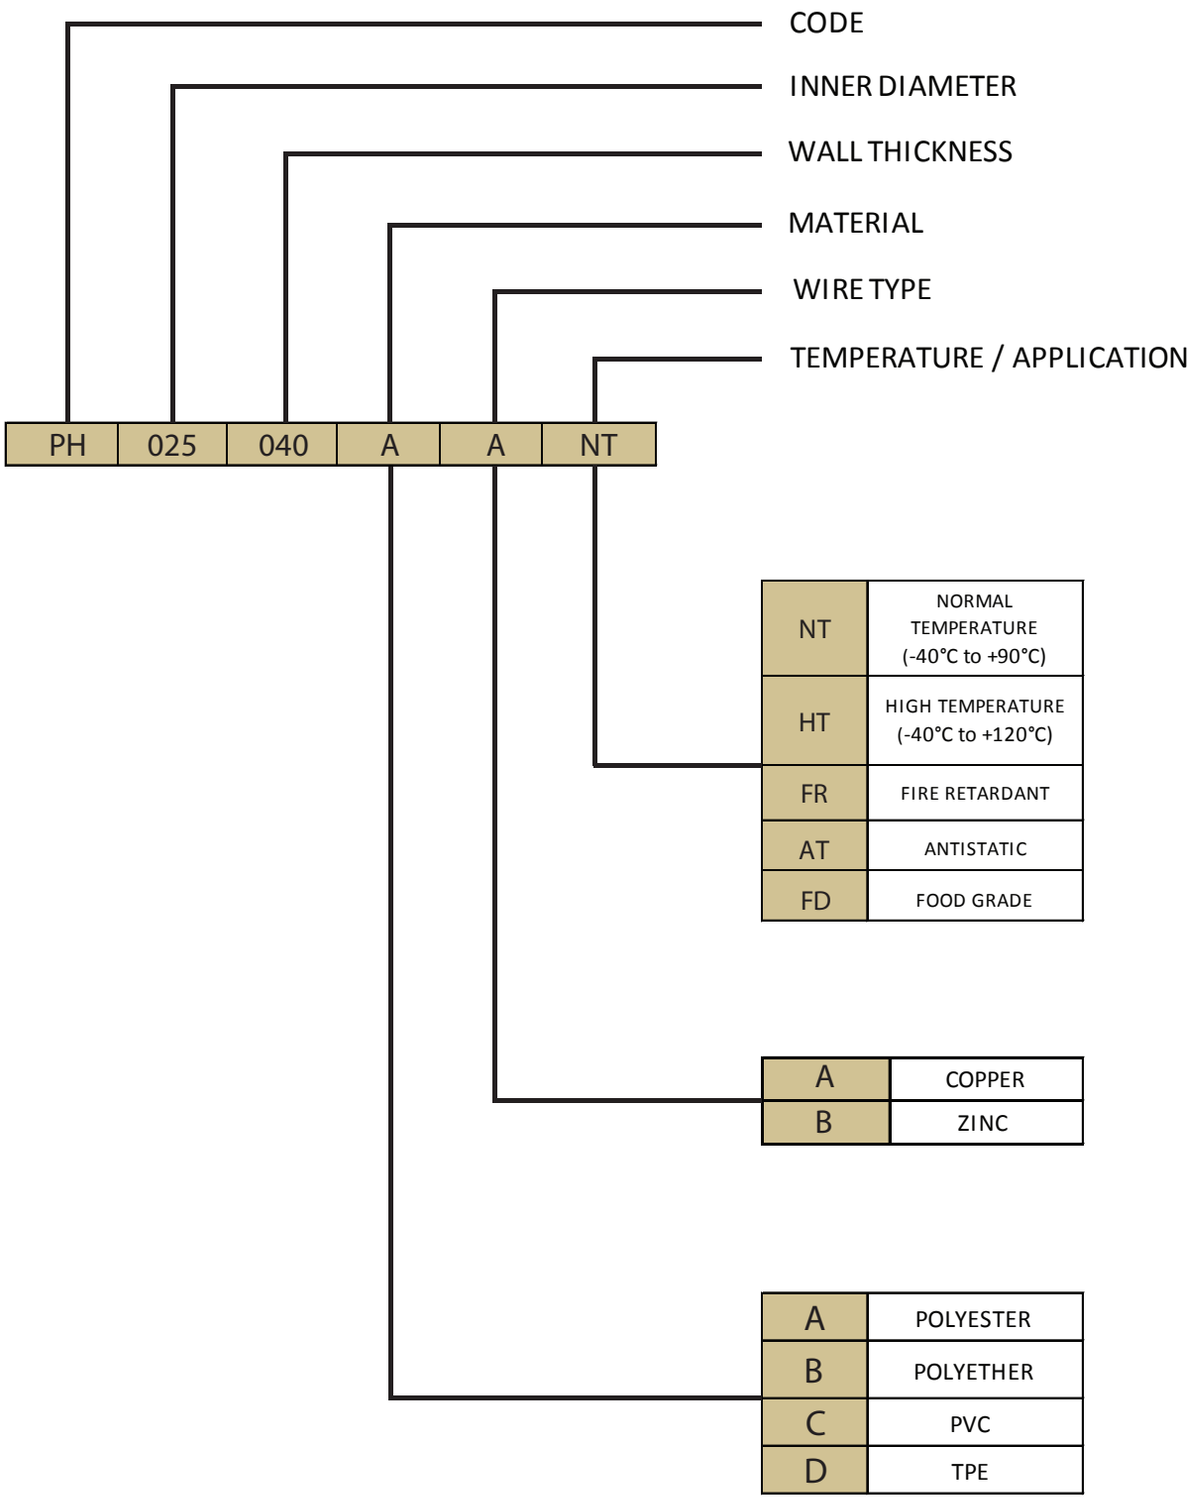
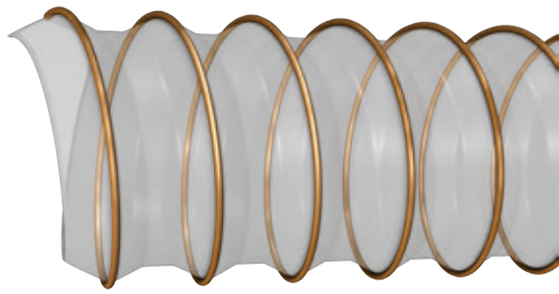
HOSE NOMENCLATURE



POLYURETHANE DUCTING - STANDARD

Polyhose Proprietary Product



Construction

Wall	Polyester Polyurethane
Spiral	Spring Steel Wire
Properties	Extremely flexible, Light in weight, Microbe - resistance, Good chemical resistance, Good UV and ozone resistance, Anti static if connected with helical wire
Application	Suction & transport of abrasive solids, liquids, fine grained particles, such as dust and powder. Used in extraction of oil mist, paper & textile fibers

Note: Length upto 20 meters. Also special sizes are available on request

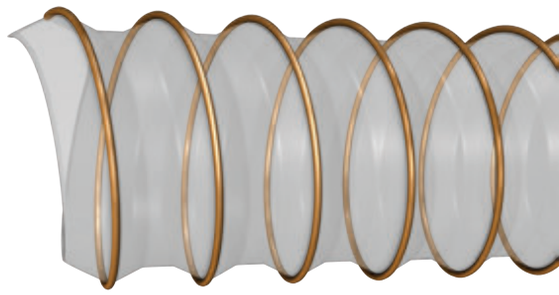
POLYURETHANE DUCTING - HEAVY C

Polyhose Proprietary Product



Construction

Wall	Polyester Polyurethane
Spiral	Spring Steel Wire
Properties	Extremely flexible, Light in Weight, Microbe - resistance, Good chemical resistance, Good UV and ozone resistance
Application	Suction & transport of abrasive solids, liquids, fine grained particles, such as dust and powder. Used in extraction of oil mist, paper & textile fibers

Note: Length upto 20 meters. Also special sizes are available on request

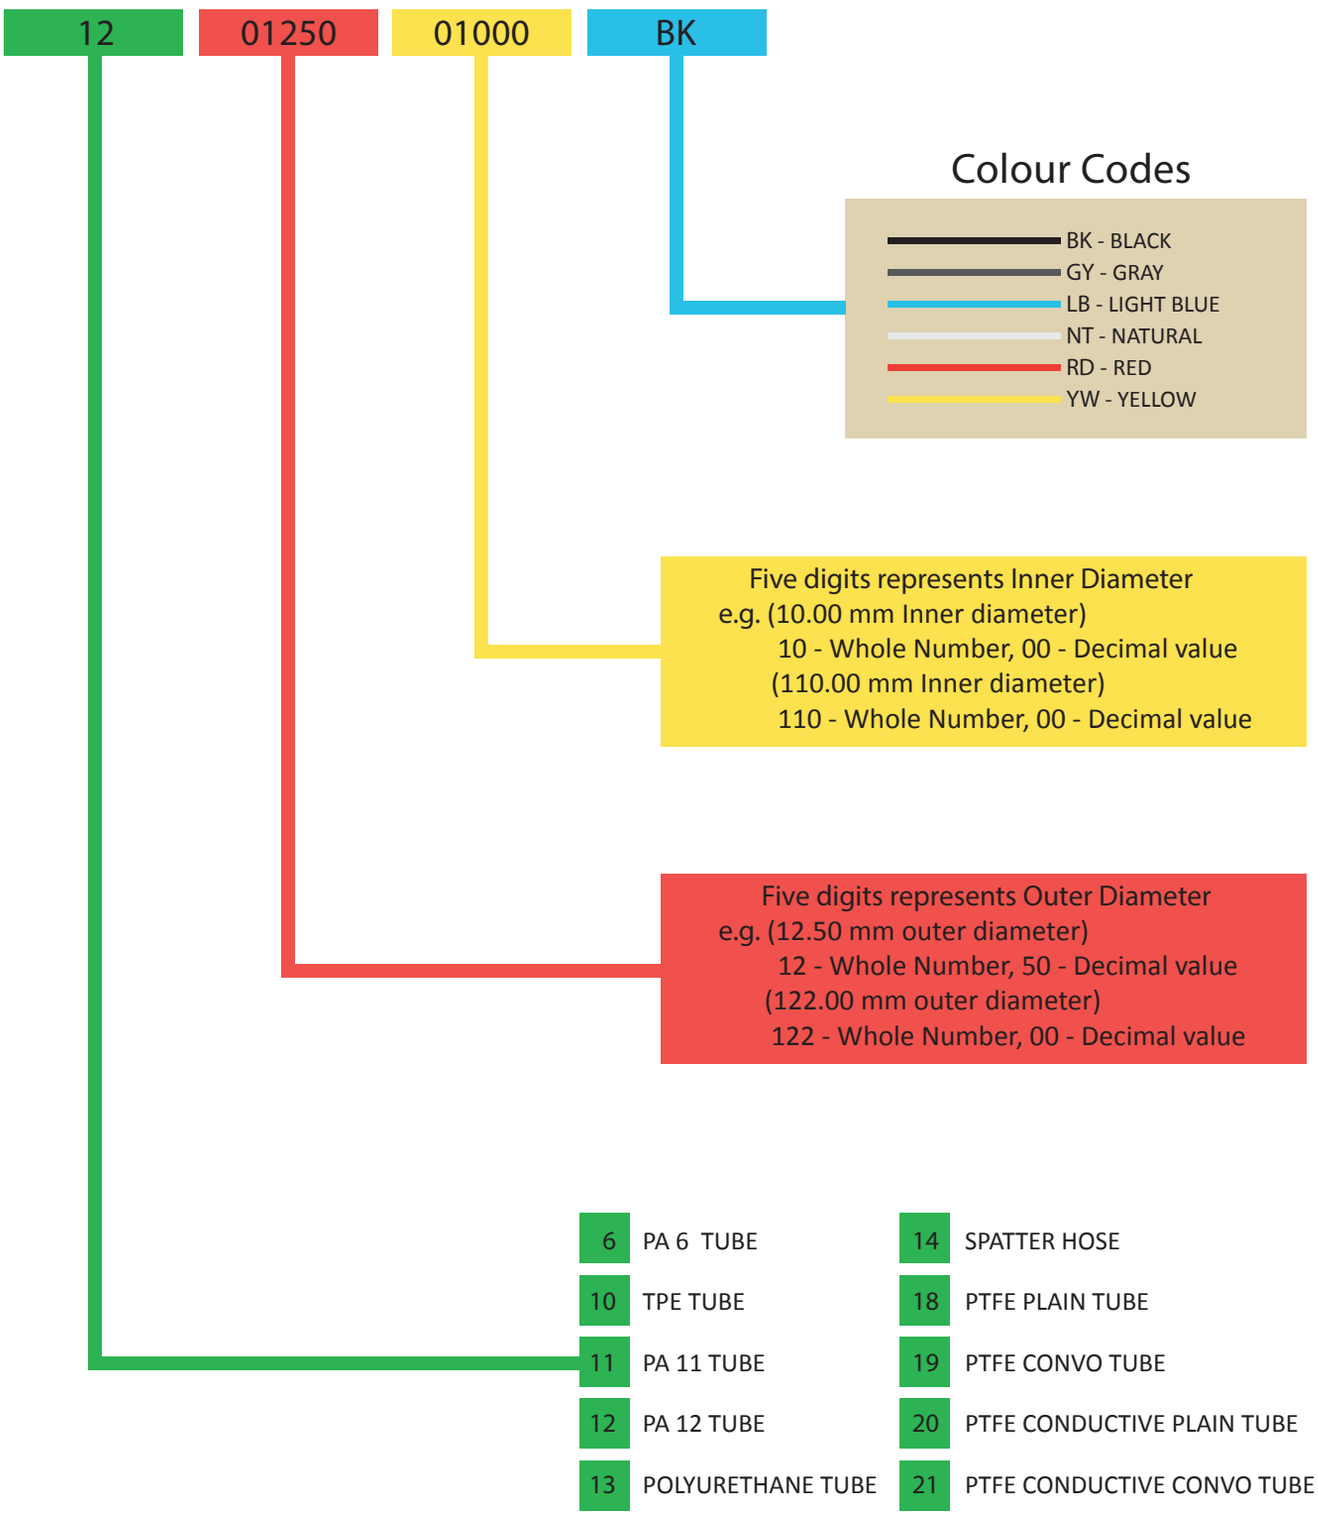
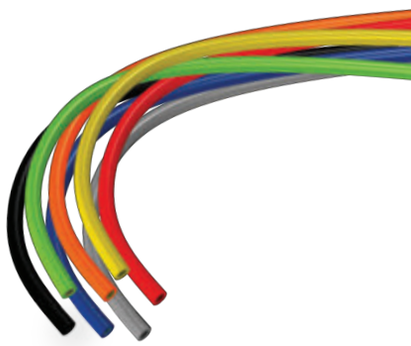
PRODUCT CODE NOMENCLATURE



POLYAMIDE TUBING

Applicable Standard : DIN73378, DIN74324



Application — Automotive gasoline, High pressure lubricants, Refrigeration lines, Gasoline in various industries, Fuel lines for petrol engines, Beverage lines, For conveying hydrocarbon, For Conveying Vegetable oil, For Conveying Ester, etc., Air line on pneumatic controls systems, Lines for air compressors & vacuum pumps

Note: We also supply PA11 and TPE tubes. Kindly refer our part nomenclature before ordering. Also special sizes and colours are available on request. Multilayer upto 5 layers available on request

POLYURETHANE TUBING

Polyhose Proprietary Product

Properties UV-Resistant
Silicone free
Good vibration absorption
Supreme abrasion resistance
Consistent tensile strength for long life

Application Pneumatics, Robotics, Automation, Cabling , Food processing

Note: Also special sizes and colours are available on request

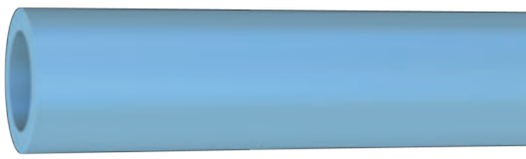
PTFE TUBE

Polyhose Proprietary Product



KEY PROPERTIES OF PTFE:

- Polytetrafluoroethylene (P.T.F.E) has the lowest coefficient of friction of all polymers
- Useful in high temperature applications
- Very good chemical resistance to all common solvents, acids and bases
- PTFE is virtually unaffected by oxygen, ozone and UV light
- Excellent dielectric insulation properties
- The working temperature of PTFE is extremely broad, ranging from 260° C (500° F) to -270° C (-454° F)

Note: We also supply Convoluted tubes, Conductive PTFE Plain and PTFE Conductive Convoluted tubes kindly refer our part nomenclature before ordering. Also special sizes are available on request

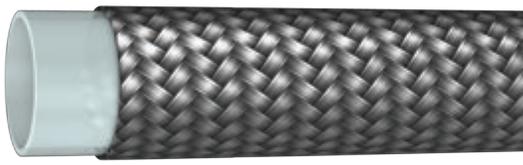
Note: We also supply Convoluted tubes , Conductive PTFE Plain and PTFE Conductive Convoluted tubes kindly refer our part nomenclature before ordering. Also special sizes are available on request

PH179 - R14

Applicable Standard: SAE J517 - 100R14



Construction

Core — Sintered tube of polytetrafluoroethylene (P.T.F.E)

Reinforcement — Single braid of 304 series of stainless steel wire

Application — P.T.F.E hose has an excellent temperature characteristics both in high and low temperature, Excellent chemical resistance, non contamination properties, low coefficient of friction and resists deterioration. Therefore the hose is used generally in applications where all or one of the above properties is the main criteria

Note: Double braided available for higher performance, please check our part # PH381

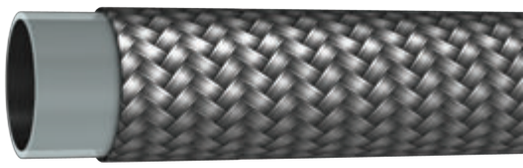
PH311- (ELECTRICAL CONDUCTIVE) - R14

Applicable Standard: SAE J517 - 100R14



Construction

Core — Sintered tube of polytetrafluoroethylene (P.T.F.E) (Electrical Conductive)

Reinforcement — Single braid of 304 series of stainless steel wire

Application — P.T.F.E hose has an excellent temperature characteristics both in high and low temperature, Excellent chemical resistance, non contamination properties, low coefficient of friction and resists deterioration. Therefore the hose is used generally in applications where all or one of the above properties is the main criteria

Note: Double braided available for higher performance, please check our part # PH383

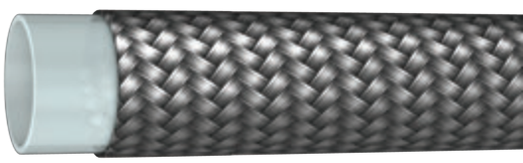
PH313 - R14 INCREASED WALL

Applicable Standard: SAE J517 - 100R14



Construction

Core Sintered tube of polytetrafluoroethylene (P.T.F.E)

Reinforcement Single braid of 304 series of stainless steel wire

Application P.T.F.E hose has an excellent temperature characteristics both in high and low temperature, Excellent chemical resistance, non contamination properties, low coefficient of friction and resists deterioration. Therefore the hose is used generally in applications where all or one of the above properties is the main criteria

Note : Available in electrical conductive version and our part # shall be PH314

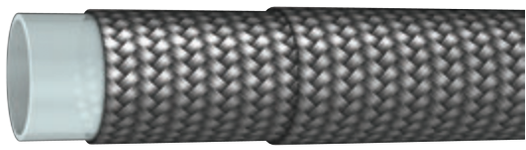
PH382 - PTFE GAS HOSE

Polyhose Proprietary Product



Construction

Core — Special quality of Sintered tube of polytetrafluoroethylene (P.T.F.E)

Reinforcement — Double braids of 304 series of stainless steel wire

Application — P.T.F.E hose has an excellent temperature characteristics both in high and low temperature. Excellent chemical resistance, non contamination properties, low coefficient of friction and resists deterioration. Therefore the hose is used generally in applications where all or one of the above properties is the main criteria Transport of cryogenic gases at high pressures

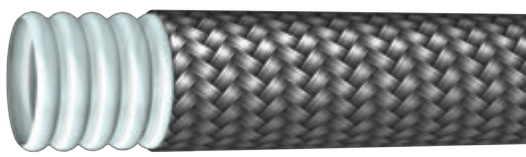
PH370 - PTFE - CONVOLUTED HOSE

Polyhose Proprietary Product



Construction

Core — Helically convoluted sintered tube of polytetrafluoroethylene (P.T.F.E)

Reinforcement — Single braid of 304/316 series of stainless steel wire

Application — P.T.F.E hose has an excellent temperature characteristics both in high and low temperature. Excellent chemical resistance, non contamination properties, low coefficient of friction and resists deterioration. Therefore the hose is used generally in applications where all or one of the above properties is the main criteria in automotive, chemical, pharmaceutical & food processing, plastic & rubber molding machines. Also for some applications the tube can also be made conductive to dissipate electro-static charges

Note: Working and burst pressure are at 20°C Temperature

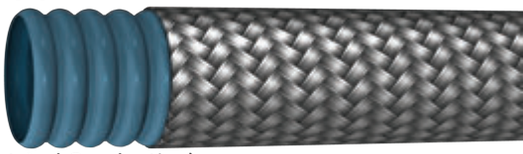
PH371 - PTFE - ELECTRICAL CONDUCTIVE CONVOLUTED HOSE

Polyhose Proprietary Product



Construction

Core Helically convoluted sintered tube of polytetrafluoroethylene (P.T.F.E) (Electrical Conductive)

Reinforcement Single braid of 304/316 series of stainless steel wire

Application P.T.F.E hose has an excellent temperature characteristics both in high and low temperature. Excellent chemical resistance, non contamination properties, low coefficient of friction and resists deterioration. Therefore the hose is used generally in applications where all or one of the above properties is the main criteria in automotive, chemical, pharmaceutical & food processing, plastic & rubber molding machines. Also for some applications the tube can also be made conductive to dissipate electro -static charges

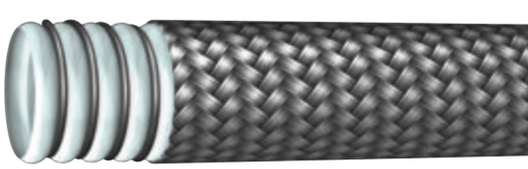
PH782 - CONVOLUTED PTFE HOSE WITH HELIX WIRE AND STAINLESS STEEL STANDARD WALL

Polyhose Proprietary Product



Construction

Core Helically convoluted sintered tube of polytetrafluoroethylene (P.T.F.E) External AISI 304 Wire Support

Reinforcement Single braid of 304 of stainless steel wire

Application High temperature steam lines. Very high vacuum lines

Note: Available in medium wall version and our part # shall be PH792

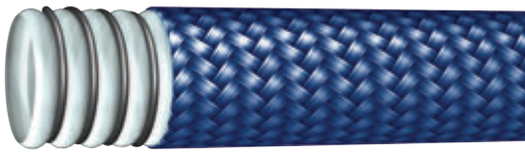
PH783 - CONVOLUTED PTFE HOSE WITH HELIX WIRE AND POLYPROPYLENE YARN STANDARD WALL



Polyhose Proprietary Product

Construction

Core — Helically convoluted sintered tube of polytetrafluoroethylene (P.T.F.E) External AISI 304 Wire Support

Reinforcement — Single braid of polypropylene yarn

Application — High temperature lines where vibrations and frequent handling are involved

Note: Available in medium wall version and our part # shall be PH793. Available with PVDF yarn braid and our part # shall be PH784 and available in medium wall version and our part # shall be PH794

PH785 - CONVOLUTED PTFE HOSE WITH POLYPROPYLENE YARN - STANDARD WALL

Polyhose Proprietary Product

Construction

Core — Helically convoluted sintered tube of polytetrafluoroethylene (P.T.F.E)

Reinforcement — Single braid of polypropylene yarn

Application — High temperature lines where vibrations and frequent handling are involved. Reduced weight makes it suitable for easy handling

Note: Available in medium wall version and our part # shall be PH795. Available with PVDF yarn braid and our part # shall be PH786 and available in medium wall version and our part # shall be PH796

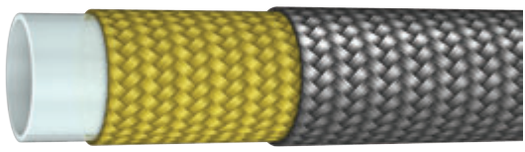
PH775 - GAS HOSE - ARAMID



Polyhose Proprietary Product

Construction

Core — Sintered tube of polytetrafluoroethylene (P.T.F.E)

Reinforcement — One or more braids of aramid fiber with one braid of 304 stainless steel wire. Thicker wall in PTFE core guarantees minimum diffusion and making ideal for gas applications

Application — Very high pressure gas lines

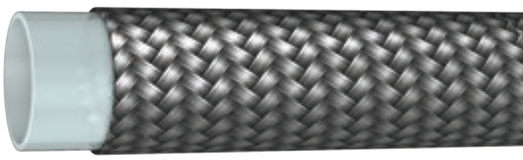
PH776 - GAS HOSE - 1W

Polyhose Proprietary Product



Construction

Core Sintered tube of polytetrafluoroethylene (P.T.F.E)

Reinforcement Single braid of 304 Stainless steel wire. Thicker wall in PTFE core guarantees minimum diffusion and making ideal for gas applications

Application High pressure gas lines like gas cylinders, breathing apparatus and aerosol charging lines.

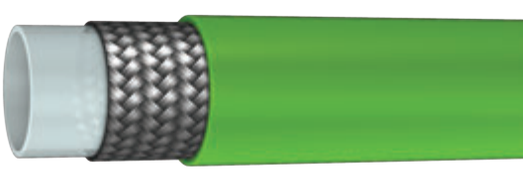
PH777 - BRAKE FLUID HOSE

Polyhose Proprietary Product



Construction

Core Sintered tube of polytetrafluoroethylene (P.T.F.E)

Reinforcement Single braid of 304 series of stainless steel wire

Cover PVC / PU (Polyurethane) neon green

Application For braking systems in mountain bikes and motorcycles

Note: Special colours available on request

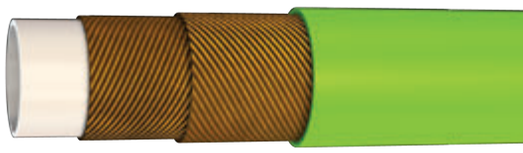
PH902 - 2 SPIRALS OF HIGH TENSILE STEEL WIRE

Polyhose Proprietary Product



Construction

Core I.D 3mm - 8mm Polyoxymethylene (POM)
I.D 10mm - 25mm Polyamide (PA)

Reinforcement 2 Spirals of high tensile steel wire

Cover Polyamide (PA) - Green

Application Water blast: Heat exchanger tube cleaning
Hydraulics: Pressure test equipment (valves, tooling and control panels), hydraulic tools (instrumentation packages for gauges, control of service equipment, hydraulic jacks, hydraulic tools)

PH902P - 2 SPIRALS OF HIGH TENSILE STEEL WIRE, 1 BRAID OF STEEL WIRE

Polyhose Proprietary Product

Construction

Core Polyamide (PA)

Reinforcement 2 Spirals of high-tensile steel wire ,1 braid of steel wire

Cover Polyurethane (PUR) - Black

Application Hydraulics: Hydraulic tools (instrumentation packages for gauges, control of service equipment, hydraulic jacks, hydraulic tools)
Oil and Gas: Grease injection, control of subsea hydraulic components

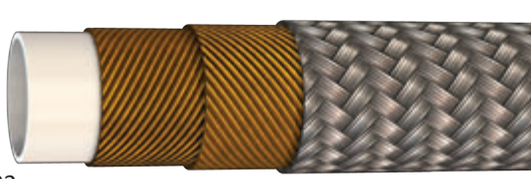
PH903 - 2 SPIRALS OF HIGH TENSILE STEEL WIRE, 1 BRAID OF G.I STEEL WIRE



Polyhose Proprietary Product

Construction	
Core	Polytetrafluoroethylene (PTFE)
Reinforcement	2 Spirals of high-tensile steel wire ,1 braid of G.I steel wire
Safety factors for higher temperatures	up to 50 °C - 1,0 / up to 100°C - 0,95 / up to 150°C - 0,9 / up to 200°C - 0,83
Application	Automotive: Hot Melt Adhesives / Hot Glue Dispensing, Injection Molding, Chemical Transfer / Paint Transfer, Robotic Systems, Compressed Gas

Item Code	DN	ID		OD	WP		BP		BR/r	W

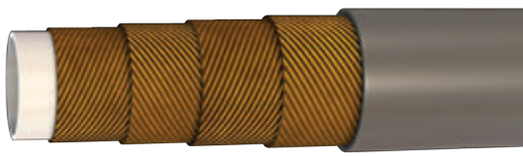
Temperature Range: Continuous: -70°C to +200°C

Important Information!
PH903 series hoses are intended for being used as basic hoses for heating hose systems. They do not have an outer cover and the wires are not protected against corrosion. It is not allowed to use these hoses in a "normal" hose assembly without taking the right steps to prevent the corrosion of the wires because there exists the risk of injury as well as the possibility of the failure of the hose assembly.
PH903 series hoses are available as a special execution with a plastic outer cover. For further information, please contact our Polyhose sales personnel

PH904 - 4 SPIRALS OF HIGH TENSILE STEEL WIRE

Polyhose Proprietary Product



Construction

Core I.D 3mm - 10mm Polyoxymethylene (POM)
I.D 13mm - 25mm Polyamide (PA)

Reinforcement 4 Spirals of high tensile steel wire

Cover Polyamide (PA) - Grey

Application Waterblast: Heat exchanger tube cleaning
Hydraulics: Bolt tensioning, pressure test equipment (valves, tooling and control panels), hydraulic tools (instrumentation packages for gauges, control of serice equipment, hydraulic jacks, hydraulic tools)
Oil and Gas: Grease injection, chemical injection, control of subsea hydraulic components, nitrogen service, gaseous media handling

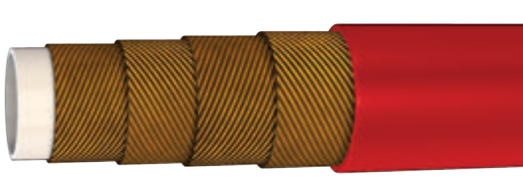
6

PH904R - 4 SPIRALS OF HIGH TENSILE STEEL WIRE

Polyhose Proprietary Product



Construction

Core Polyamide (PA)

Reinforcement 4 Spirals of high tensile steel wire

Cover Polyamide (PA) - Red

Application Waterblast: Heat exchanger tube cleaning, surface preparation (Concrete removal, surface cleaning of buildings, paint removal), tank and vessel cleaning, ultra high pressure waterjet cutting and hydro demolition (cutting and demolition of armoured concrete, pipelines, paper or steel)
Hydraulics: Pressure test equipment (valves, tooling and control panels), hydraulic tools (instrumentation packages for gauges, control of service equipment, hydraulic jacks, hydraulic tools)
Oil and Gas: Grease injection, chemical injection, control of subsea hydraulic components, nitrogen service, gaseous media handling

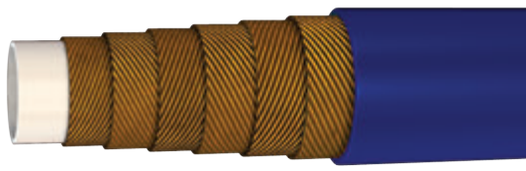
PH906 - 6 SPIRALS OF HIGH TENSILE STEEL WIRE

Polyhose Proprietary Product



Construction

Core I.D 3mm to 10mm Polyoxymethylene (POM)
I.D 13mm to 25mm Polyamide (PA)
Reinforcement 6 Spirals of high tensile steel wire
Cover Polyamide (PA) - Dark Blue

Application Water blast: Surface preparation (Concrete removal, surface cleaning of buildings, paint removal), tank and vessel cleaning, ultra high-pressure waterjet cutting and hydro demolition (cutting and demolition of armoured concrete, pipelines, paper or steel)
Hydraulics: Hydraulic tools (instrumentation packages for gauges, control of service equipment, hydraulic jacks, hydraulic tools)

PH906R - 6 SPIRALS OF HIGH TENSILE STEEL WIRE

Polyhose Proprietary Product

Construction

Core Polyoxymethylene (POM)
Reinforcement 6 Spirals of high tensile steel wire
Cover Polyamide (PA) - Red

Application Water blast: Heat exchanger tube cleaning, surafce preparation (concrete removal, surface cleaning of the buildings, paint removal), tank and vessel cleaning, ultra high-pressure water jet cutting and hydro demolition (cutting and demolition of armoured concrete, pipelines, paper or steel)
Hydraulics: Bolt tensioning, pressure test equipment (valves, tooling and control panels), hydraulic tools (instrumentation packages for gauges, control of service equipment, hydraulic jacks, hydraulic tools)

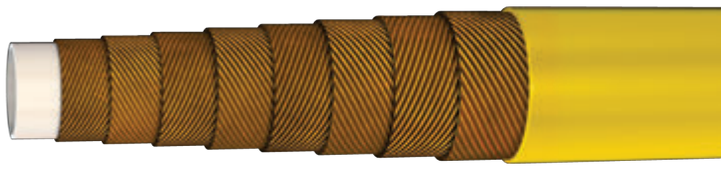
PH908 - 8 SPIRALS OF HIGH TENSILE STEEL WIRE

Polyhose Proprietary Product



Construction

Core Polyoxymethylene (POM)

Reinforcement 8 Spirals of high tensile steel wire

Cover Polyamide (PA) - Yellow

Application Water blast: Heat exchanger tube cleaning, surface preparation (Concrete removal, surface cleaning of buildings, paint removal), tank and vessel cleaning, ultra high - pressure waterjet cutting and hydro demolition (cutting and demolition of armoured concrete, pipelines, paper or steel)
Hydraulics: Pressure test equipment (valves, tooling and control panels), hydraulic tools (instrumentation packages for gauges, control of service equipment, hydraulic jacks, hydraulic tools), hydroforming
Oil and Gas: Gaseous media handling

7

PH360 - PNEUMATIC TOOL HOSE

Applicable Standard: Polyhose Proprietary Product. Exceeds IS 446 1987 Type - 2

Construction

Core	Plasticized PVC, Black
Reinforcement	Double braids of Synthetic fiber
Cover	Thermo-compound, Black colour
Application	Specially designed for various industrial machinery, under ground application, civil construction and others. Such as watering, airline connection, road building, pneumatic tools, etc.

Note : Special colours available on request

Temperature Range: Continuous: -20°C to +80°C

Construction
Hose made from Polypropylene fabric and films with PVC coated fabric cover, inner and outer wires are galvanised MS

Application
Suction and discharge hose specially designed for transfer of petroleum product by Road Tankers, rail Tankers and Loading Gantries

Colour
Black with white strip

PH802 : POLY - OIL HOSE

Applicable Standard: EN 13765 TYPE 2 & AS 2117 TYPE 3 GRADE 1 & 2

Item Code	Nominal Bore	OD	WP		BR/r
	mm	mm	psi	bar	mm
PH802-16	25	38	150	10	90
PH802-24	38	52	150	10	120

PH802-48	75	92	150	10	250
PH802-64	100	115	150	10	350

Temperature Range: Continuous: -30°C to +80°C

Construction
Hose made from Polypropylene fabric and films, films with PVC coated fabric cover, inner and outer wires are galvanised MS

Application
Suitable for the suction and discharge transfer of petroleum product in in-plant application

Colour
Blue with white strip

PH803 : POLY - AVIATION FUEL COMPOSITE HOSE

Applicable Standard: EN 13765 TYPE 2 & AS 2683 TYPE 1 GRADE 1,2 & 3

Item Code	Nominal Bore	OD	WP		BR/r
	mm	mm	psi	bar	mm
PH803-24	38	50	100	7	75
PH803-32	50	61	100	7	80

PH803-48	75	88	100	7	125
PH803-64	100	112	100	7	220

Temperature Range: Continuous: -30°C to +80°C

Construction
Hose made from Polypropylene fabric and films with PVC coated fabric cover, Outer wire is galvanised mild steel and the inner wire is SS or Galvanised MS

Application
Designed for transfer of fuel in the aviation industry

Colour
Yellow with white strip

PH804 : POLY - FUEL HOSE

Applicable Standard: EN 13765 TYPE 2 & AS 2683 TYPE 1 GRADE 1,2 & 3

Item Code	Nominal Bore	OD	WP		BR/r
	mm	mm	psi	bar	mm
PH804-16	25	32	100	7	50
PH804-24	38	50	100	7	75
PH804-32	50	61	100	7	80
PH804-40	65	76	100	7	90
PH804-48	75	88	100	7	125
PH804-64	100	112	100	7	220

Temperature Range: Continuous: -30°C to +80°C

Construction

Hose made from Polypropylene fabric and films with PVC coated fabric cover, Inner & Outer wire is galvanised mild steel

Application

Suction and discharge hose mainly for transfer of petroleum products by road, rail tankers and loading gantries

Colour

Yellow with white strip

PH805 : POLY - PTFE CHEMICAL

Applicable Standard: EN 13765 TYPE 2

Item Code	Nominal Bore	OD	WP		BR/r
	mm	mm	psi	bar	mm
PH805-16	25	38	150	10	90
PH805-24	38	52	150	10	120
PH805-32	50	64	150	10	150

PH805-48	75	92	150	10	210
PH805-64	100	120	150	10	340

Temperature Range: Continuous: -30°C to +140°C

Construction

Hose made from Polypropylene fabric and films with PVC coated fabric cover, Inner & outer SS 316 wire and lined with layer of PTFE Film

Application

Suitable for various Acids & Alkalines

Colour

Red with white strip

PH806 : POLY - CHEMICAL-SS

Applicable Standard: EN 13765 TYPE 2

Item Code	Nominal Bore	OD	WP		BR/r
	mm	mm	psi	bar	mm
PH806-16	25	38	150	10	90
PH806-24	38	52	150	10	120

PH806-48	75	92	150	10	210
PH806-64	100	120	150	10	340

Temperature Range: Continuous: -30°C to +80°C

Construction

Hose made from Polypropylene fabric and films with PVC coated fabric cover, inner wire is SS and outer wire of Galvanised MS

Application

Transfer of various acids and alkalines

Colour

Green with white strip

PH807 : POLY - CHEMICAL HOSE - P P

Applicable Standard: EN 13765 TYPE 3

Item Code	Nominal Bore	OD	WP		BR/r
	mm	mm	psi	bar	mm
PH807-16	25	38	150	10	90
PH807-24	38	52	150	10	125

PH807-48	75	92	150	10	220
PH807-64	100	120	150	10	350

Temperature Range: Continuous: -30°C to +80°C

Construction

Hose made from Polypropylene fabric and films with PVC coated Fabric cover, inner wire of polypropylene coated steel wire, outer wire of Galvanised MS

Application

Transfer of various acids and alkalines

Colour

Grey with white strip

PH808 : POLY - CHEMICAL DOCK HOSE

Applicable Standard: EN 13765 TYPE 3 AND AS 2117 TYPE 2 GRADE 1 AND 2

Item Code	Nominal Bore	OD	WP		BR/r
	mm	mm	psi	bar	mm
PH808-64	100	120	200	14	430
PH808-64	150	175	200	14	550
PH808-64	200	240	200	14	750
PH808-64	250	325	200	14	950

Temperature Range: Continuous: -30°C to +100°C

Construction

Hose made from heavy duty Polypropylene fabric and films with a double layer of PVC coated fabric cover, inner and outer wire of SS 316.

Application

Heavy duty Suction and discharge of bulk chemical in raod and rail tanker,dockside and ship to shore

Colour

Royal Blue with white strip

PH 809 : POLY - DOCK PTFE

Applicable Standard: EN 13765 TYPE 3 AND AS 2117 TYPE 2 GRADE 1 AND 2

Item Code	Nominal Bore	OD	WP		BR/r
	mm	mm	psi	bar	mm
PH809-64	100	120	200	14	430
PH809-96	150	175	200	14	550
PH809-128	200	240	200	14	750
PH809-166	250	325	200	14	950

Temperature Range: Continuous: -30°C to +100°C

Construction

Heavy duty PP fabric and films with a double layer of PVC coated fabric cover with inner SS 316 and outer wire of galvanized MS and is lined with layer of PTFE Film

Application

Heavy duty Suction and discharge of bulk chemical in raod and rail tanker, dockside and ship to shore

Colour

Red with white strip

PH 810 : POLY - DOCK PG HOSE

Applicable Standard: EN 13765 TYPE 3 AND AS 2117 TYPE 2 GRADE 1 AND 2

Item Code	Nominal Bore	OD	WP		BR/r
	mm	mm	psi	bar	mm
PH810-64	100	120	200	14	440

PH810-128	200	240	200	14	760
PH810-166	250	325	200	14	960

Temperature Range: Continuous: -30°C to +100°C

Construction

Heavy duty PP fabric and films with a double layer of PVC coated fabric cover with inner wire of PP coated Steel and outer wire of galvanised MS

Application

Heavy duty Suction and discharge of bulk chemical in road and rail tanker,dockside and ship to shore

Colour

Blue with white strip

PH811 : POLY - OIL DOCK HOSE

Applicable Standard: EN 13765 TYPE 3 AND AS 2117 TYPE 2 GRADE 1 AND 2

Item Code	Nominal Bore	OD	WP		BR/r
	mm	mm	psi	bar	mm
PH811-64	100	120	200	14	430

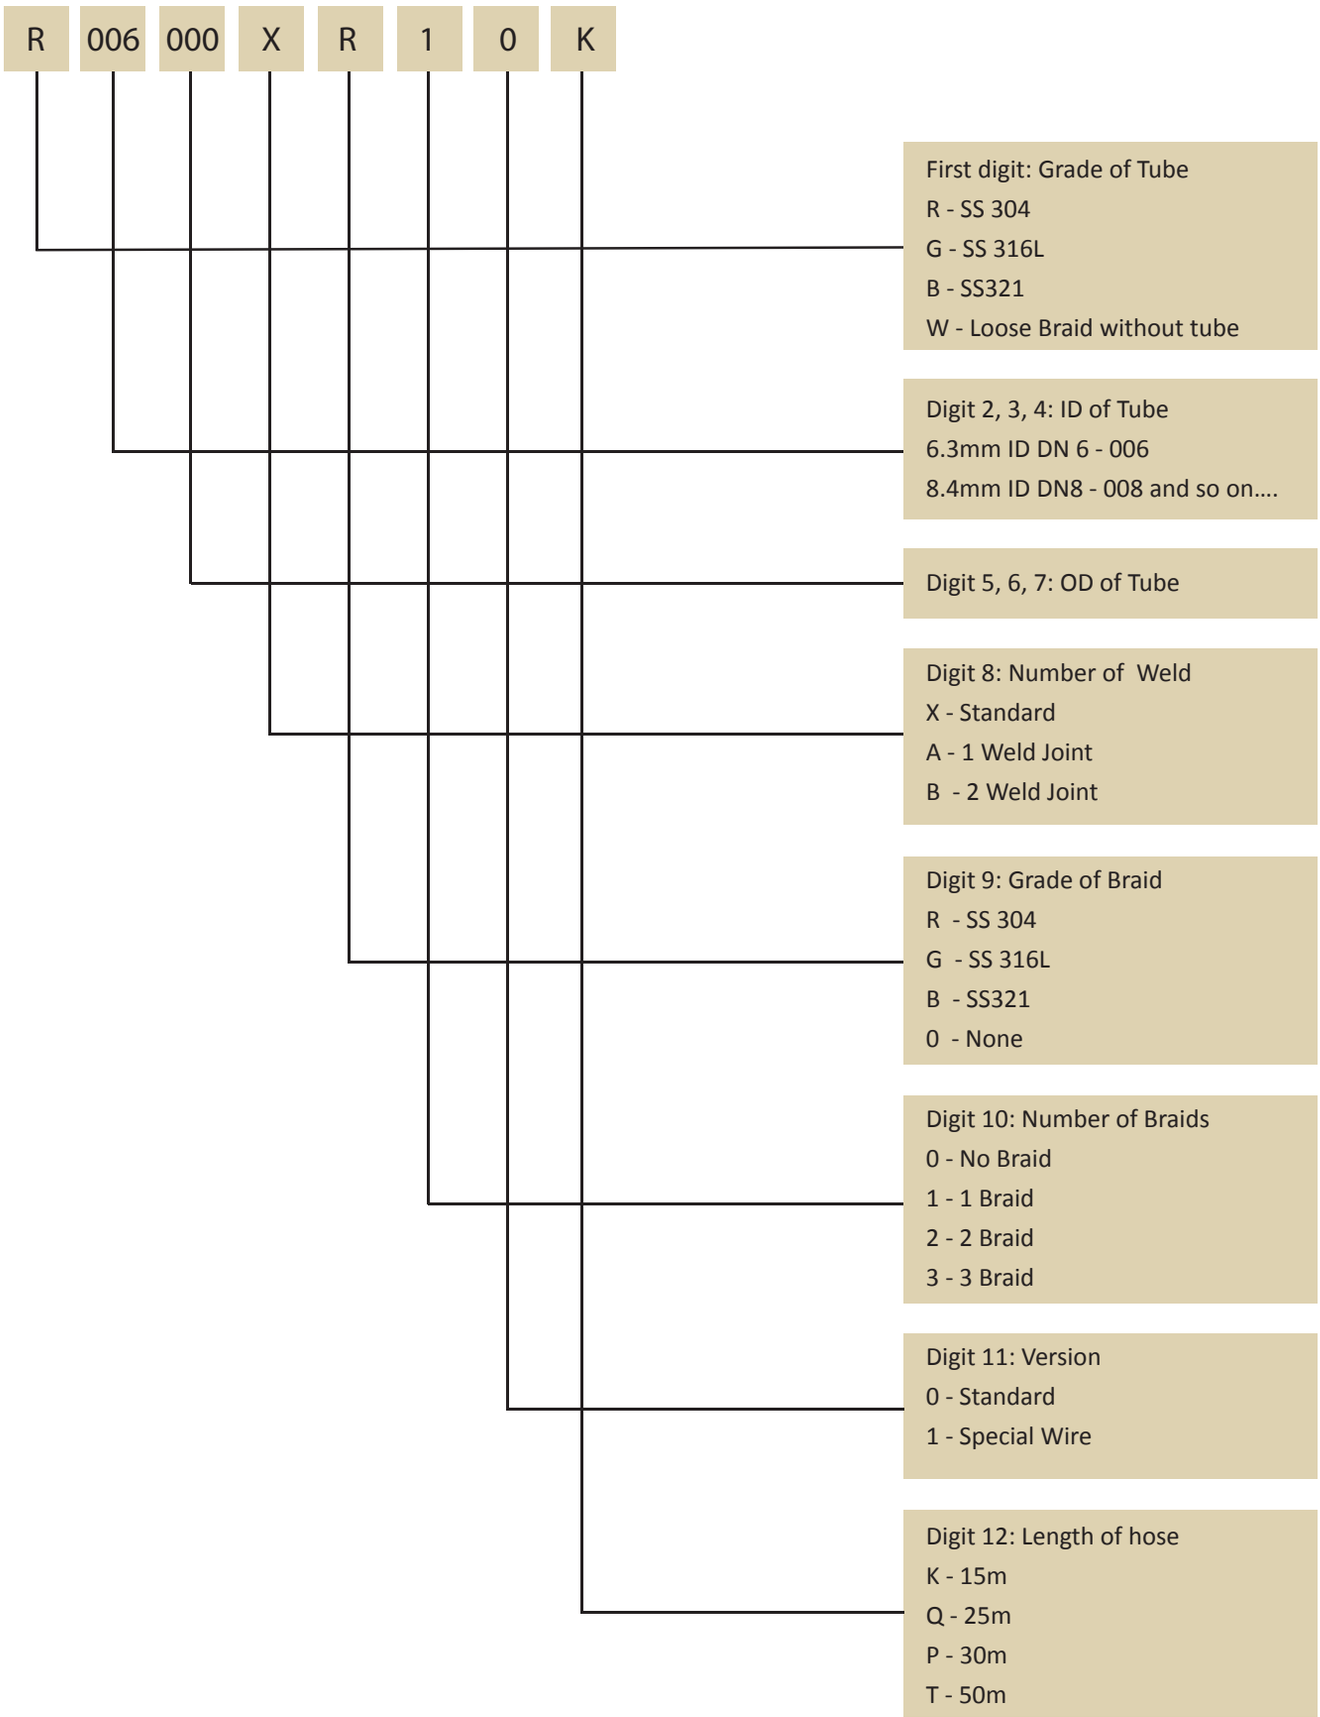
PRODUCT NOMENCLATURE



STANDARD CORRUGATED FLEXIBLE METAL HOSE

Structure	Annular corrugated flexible metal hoses can be produced from longitudinally welded tubes corrugated mechanically with or with out braiding
Standards	We are following EN ISO 10380 for stainless steel corrugated flexible hoses
Hose material	Stainless steel AISI 304, AISI 321 and AISI316L
Braiding material	Stainless steel AISI 304 and 316 L
Suitable fittings types	Threaded ends welded connections Flanges as per customer specifications
Product supplied Coils	DN6-25 -15m, 25m, 30m and 50m DN32-50 -15m, 25m,30m and 50m DN65-100 -25m

Note: Please contact our sales team for specific lengths

Recommended Practices for Hydraulic Hose Assemblies

Foreword

This SAE Recommended Practice is intended as a guide to consider when selecting, routing, fabricating, installing, replacing, maintaining and storing hose for fluid-power systems. It is subject to change to keep pace withexperience and technical advances. For those new to hose use in fluid-power systems, this guide outlines practices tonote during each phase of system design and use. Experienced designers and users skilled in achieving proper results,as well as the less experienced, can use this outline as a list of considerations to keep in mind. Fluid power systems are complex and require extensive knowledge of both the system requirements and the various types of hose. Therefore, all-inclusive, detailed, step-by-step instructions are not practical and are beyond the scope of this document. Less experienced designers and user's who need more information can consult specialists such as hose suppliers and manufacturers. This guide can improve the communication process. Safety Considerations — These recommended practices involve safety considerations; note these carefully during all phases of design and use of hose systems. Improper selection, fabrication, installation or maintenance of hose and hose assemblies for fluid-power systems may result in serious personal injury or property damage. These recommended practices can reduce the likelihood of component or system failure, thereby reducing the risk of injury or damage.

1. Scope

SAE J1273 provides guidelines for selection, routing, fabrication, installation, replacement, maintenance and storage of hose and hose assemblies for fluid-power systems. Many of these SAE Recommended Practices also may be suitable for other hose and systems.

2. References

2.1 Applicable Documents – The following publications form a part of this specification to the extent specified herein. Unless otherwise specified, the latest issue of SAE publications shall apply.
SAE J343 – Test and Procedures for SAE 100R Series Hydraulic Hose and Hose Assemblies.
SAE J516 – Hose Fittings
SAE J517 – Hydraulic Hose
SAE J1927 – Cumulative Damage Analysis for Hydraulic Hose Assemblies

3. Explanation of Terms

These explanations serve only to clarify this document and are not intended to stand alone. They are presented sequentially, with the former helping to explain the latter.

3.1 Fluid Power – Energy transmitted and controlled using pressurized hydraulic fluids or compressed air.

3.2 Hose – Flexible conductor. In this document, the term hose may also refer to a hose assembly with related accessories used in fluid power applications.

3.3 Hose Fitting or Fitting – Connector which can be attached to the end of a hose.

3.4 Hose Assembly – Hose with hose fittings attached.

3.5 Hose Failure – Occurrence in which a hose stops meeting system requirements.

3.6 Hose Service Life – Length of time a hose meets system requirements without needing replacement.

4. Safety Considerations

Listed in 4.1 to 4.7 are some potential conditions and situations that maylead to personal injury and/or property damage. The list is not necessarily all inclusive. Consider reasonable and feasible means, including those described in this section, to reduce the risk of injuries or property damage.

4.1 Fluid Injections – Fine streams of escaping pressurized fluid can penetrate skin and enter a human body. These fluid injections may cause severe tissue damage and loss of limb. Consider various means to reduce the risk of fluid injections, particularly in areas normally occupied by operators. Consider careful routing, adjacent components, warnings, guards, shields and training programs. Relieve pressure before disconnecting hydraulic or other lines. Tighten all connections before applying pressure. Avoid contact with escaping fluids. Treat all leaks as though pressurized and hot enough to burn skin. Never use any part of your body to check for hose leaks. If a fluid-injection accident occurs, see a doctor immediately. DO NOT DELAY OR TREAT AS A SIMPLE CUT! Any fluid injected into the skin must be surgically removed within a few hours or gangrene may result. Doctors unfamiliar with this type of injury should consult a knowledgeable medical source.

4.2 Whipping Hose – If a pressurized hose assembly blows apart, the fittings can be thrown off at high speed, and the loose hose can flail or whip with great force. This is especially true in compressible-fluid systems. When this risk exists, consider guards and restraints to protect against injury.

4.3 Burns from Conveyed Fluids – Fluid-power media may reach temperatures that can burn human skin. If there is risk of burns from escaping fluid, consider guards and shields to prevent injury, particularly in areas normally occupied by operators.

4.4 Fire and Explosion from Conveyed Fluids – Most fluid-power media, including fire-resistant hydraulic fluids, will burn under certain conditions. Fluids which escape from pressurized systems may form a mist or fine spray which can flash or explode upon contact with an ignition source. Consider selecting, guarding, and routing hose to minimize the risk of combustion. (See Section 5 and ISO 3457).

4.5 Fire and Explosions from Static-Electric Discharge – Fluid passing through hose can generate static electricity, resulting in static-electric discharge. This may create sparks that can ignite system fluids or gases in the surrounding atmosphere. When this potential exists, select hose specifically designed to carry the static-electric charge to ground.

4.6 Electrical Shock – Electrocution could occur if hose conducts electricity through a person. Most hoses are conductive. Many contain metal or have metal fittings. Even nonconductive hoses can be conduits for electricity if they carry conductive fluids. Be aware of routing or using hose near electrical sources. When this cannot be avoided, select appropriate hose. Nonconductive hoses should be considered. SAE J517–100R7 and 100R8 hoses, with orange covers marked Nonconductive" are available for applications requiring nonconductive hose.

4.7 Mechanisms Controlled by Fluid Power – Mechanisms controlled by fluid in hoses can become hazardous when a hose fails. For example, when a hose bursts, objects supported by fluid pressure may fall, or vehicles or machines may lose their brakes or steering. If mechanisms are controlled by fluid power, consider safe modes of failure that minimize risks of injury or damage.

5. Hose Selection and Routing

A wide variety of interacting factors influence hose service life and the ability of each fluid-power system to operate satisfactorily, and the combined effects of these factors on service life are often unpredictable. Therefore, these documents should not be construed as design standards. For applications outside the specifications in SAE J517, SAE J516, or other relevant design standards, performance of hose assemblies should be determined by appropriate testing. Carefully analyze each system. Then design routings and select hose and related components to meet the system-performance and hose service- life requirements, and to minimize the risks of personal injury and/or property damage. Consider the following factors:

5.1 System Pressures – Excessive pressure can accelerate hose assembly failure. Analyze the steady-state pressures, and the frequency and the amplitude of pressure surges, such as pulses and spikes. These are rapid and transient rises in pressure which may not be indicated on many common pressure gauges and can be identified best on highfrequency-response electronic measuring instruments. For maximum hose service life, hose selection should be based on a system pressure, including surges, that is less than the hose maximum working pressure. Hose may be used above its maximum working pressure where reduced life expectancy is acceptable. SAE J1927 provides on method to help predict wire-reinforced hose service for a given hydraulic application, where the surgepressure peaks vary, and/or the highest-pressure peaks occur infrequently.

5.2 Suction – For suction applications, such as inlet flow to pumps, select hose to withstand both the negative and positive pressures the system imposes on the hose.

5.3 External Pressure – In certain applications, such as in autoclaves or under water, the external environmental pressures may exceed the fluid pressure inside the hose. In these applications, consider the external pressures, and, if necessary, consult the manufacturers.

5.4 Temperature – Exceeding hose temperature ratings may significantly reduce hose life. Select hose so the fluid and ambient temperatures, both static and transient, fall within the hose ratings. The effects of external heat sources should not raise the temperature of the hose above its maximum operating temperature. Select hose, heat shields, sleeving, and other methods for these requirements, and route or shield hose to avoid hose damage from external heat sources.

5.5 Permeation – Permeation, or effusion, is seepage of fluid through the hose. Certain materials in hose construction are more permeable than others. Consider the effects of permeation when selecting hose, especially with gaseous fluids. Consult the hose and fluid manufacturers for permeability information.

5.6 Hose-Material Compatibility – Variables that can affect compatibility of system fluids with hose materials include, but are not limited to:
A. Fluid Pressure
B. Temperature
C. Concentration
D. Duration of exposure
Because of permeation (see 5.5), consider compatibility of system fluids with the hose, tube, cover, reinforcement, and fittings. Consult the fluid and hose manufacturers for compatibility information. NOTE–Many fluid/elastomer compatibility tables in manufacturers' catalogs show ratings based on fluids at 21 C, room temperature. These ratings may change at other temperatures. Carefully read the notes on the compatibility tables, and if in doubt, consult the manufacturer. NOTE–Refer chemical resistance information.

5.7 Environment – Environmental conditions can cause hose and fitting degradation. Conditions to evaluate include, but are not limited to:
A. Ultraviolet light
B. Salt water
C. Air pollutants
D. Temperature
E. Ozone
F. Chemicals
G. Electricity
H. Abrasion
If necessary, consult the manufacturers for more information.

5.8 Static-Electric Discharge – Fluid passing through hose can generate static electricity resulting in static-electric discharge. This may create sparks that can puncture hose. If this potential exists, select hose with sufficient conductivity to carry the static electric charge to the ground.

5.9 Sizing – The power transmitted by pressurized fluid varies with pressure and rate of flow. Select hose with adequate size to minimize pressure loss, and to avoid hose damage from heat generation or excessive velocity. Conduct calculations, or consult the manufacturers for sizing at flow velocities.

5.10 Unintended Uses – Hose assemblies are designed for the internal forces of conducted fluids. Do not pull hose or use it for purposes that may apply external forces for which the hose or fittings were not designed.

5.11 Specifications and Standards – When selecting hose and fittings for specific applications, refer to applicable government, industry, and manufacturer's specifications and standards.

5.12 Unusual Applications – Applications not addressed by the manufacturer or by industry standards may require special testing prior to selecting hose.

5.13 Hose Cleanliness – The cleanliness requirements of system components, other than hose, will determine the cleanliness requirements of the application. Consult the component manufacturers' cleanliness information for all components in the system. Hose assemblies vary in cleanliness levels; therefore, specify hose assemblies with adequate cleanliness for the system.

5.14 Hose Fittings – Selection of the proper hose fittings for the hose and application is essential for proper operation and safe use of hose and related assembly equipment. Hose fittings are qualified with the hose. Therefore, select only hose fittings compatible with the hose for the applications. Improper selection of hose fittings or related assembly equipment for the application can result in injury or damage from leaks, or from hose assemblies blowing apart (see 4.2, 6.2, 6.3 and 6.4).

5.15 Vibration – Vibration can reduce hose service life. If required, conduct tests to evaluate the frequency and amplitude of system vibration. Clamps or other means may be used to reduce the effects of vibration. Consider the vibration requirements when selecting hose and predicting service life.

5.16 Hose Cover Protection – Protect the hose cover from abrasion, erosion, snagging and cutting. Special abrasion resistant hoses and hose guards are available for additional protection. Route hose to reduce abrasion from hose rubbing other hose or objects that may abrade it.

5.17 External Physical Abuse – Route hose to avoid:
A. Tensile loads
B. Side loads
C. Flattening
D. Thread damage
E. Kinking
F. Damage to sealing surfaces
G. Abrasion
H. Twisting

5.18 Swivel-Type Adapters – Swivel-type fittings or adapters do not transfer torque to hose while being tightened. Use these as needed to prevent twisting during installation.

5.19 Live Swivels – If two components in the system are rotating in relation to each other, live swivels may be necessary. These connectors reduce the torque transmitted to the hose.

5.20 Slings and Clamps – Use slings and clamps to support heavy or long hose and to keep it away from moving parts. Use clamps that prevent hose movement that will cause abrasion.

5.21 Minimum Bend Radius – The minimum bend radius is defined in SAE J343 and is specified in other SAE standards and hose manufacturer's product literature. Routing at less than minimum bend radius may reduce hose life. Sharp bending at the hose/fitting juncture may result in leaking, hose rupturing, or the hose assembly blowing apart (see 4.2 and Figure 1).

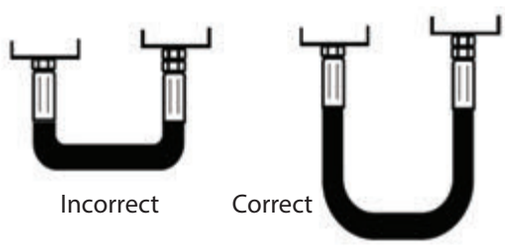

Figure 1. Minimum Bend Radius

5.22 Elbows and Adapters – In special cases, use elbows and adapters to relieve hose strain (see Figure 2).

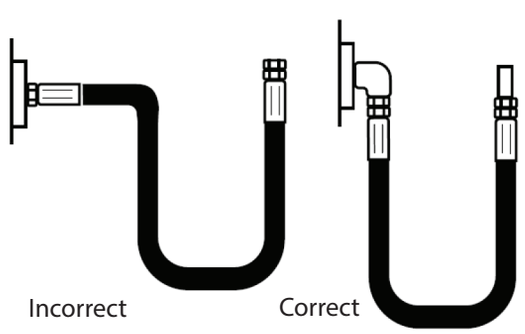

Figure 2. Elbows and Adapters

5.23 Lengths – Unnecessarily long hose can increase pressure drop and affect system performance. When pressurized, hose that is too short may pull loose from its fittings, or stress the fitting connections, causing premature metallic or seal failures. When establishing hose length, refer to Figures 3, 4, and 5; and use the following practices:

5.23.1 Motion Absorption – Provide adequate hose length to distribute movement and prevent bends smaller than the minimum bend radius.

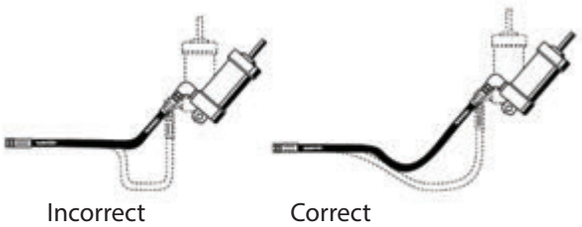

Figure 3. Motion Absorption

5.23.2 Hose and Machine Tolerances – Design hose to allow for changes in length due to machine motion and tolerances.

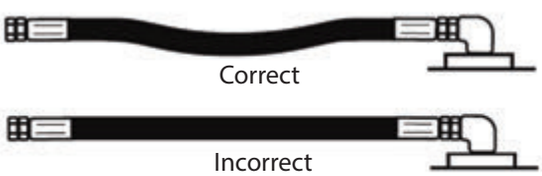

Figure 4. Hose and Machine Tolerances

5.23.3 Hose Length Due To Pressure – Design hose to accommodate length changes from changing pressures. Do not cross or clamp together high- and low-pressure hoses. The difference in length changes could wear the hose covers.

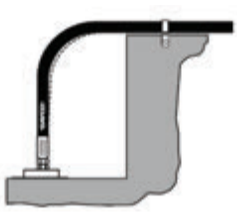

Figure 5. Hose Length Due To Pressure

5.24 Hose Movement and Bending – Hose allows relative motion between system components. Analyze this motion when designing hose systems. The number of cycles per day may significantly affect hose life. Also, avoid multiple planes of motion and twisting motion. Consider the motion of the hose when selecting hose and predicting service life. In applications that require hose to move or bend, refer to Figures 6 and 7; and use these practices:

5.24.1 Bend in Only One Plane to Avoid Twisting

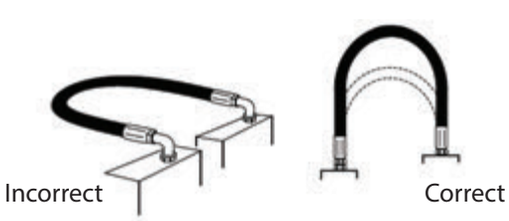

Figure 6. Bend in Only One Plane to Avoid Twisting

5.24.2 Prevent Hose Bending in More Than One Plane – If hose follows a compound bend, couple it into separate segments, or clamp into segments that flex in only one plane

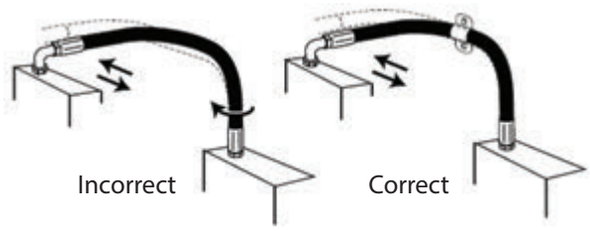

Figure 6. Prevent Hose Bending in More Than One Plane

6. Hose-Assembly Fabrication

Persons fabricating hose assemblies should be trained in the proper use of equipment and materials. The manufacturers' instructions and the practices listed as follows must be followed. Properly assembled fittings are vital to the integrity of a hose assembly. Improperly assembled fittings can separate from the hose and may cause serious injury or property damage from whipping hose, or from fire or explosion of vapor expelled from the hose.

6.1 Component Inspection – Prior to assembly, examine components for:
A. Style or type
B. Cleanliness
C. Loose covers
D. Nicks
E. Size
F. Inside obstructions
G. Visible defects
H. Damage
I. Length
J. Blisters
K. Burrs

6.2 Hose Fittings – Hose fitting components from one manufacturer are not usually compatible with fittings components supplied by another manufacturer. For example, do not use a hose fitting nipple from one manufacturer with a hose socket from another manufacturer. It is the responsibility of the fabricator to consult the manufacturer's written instructions or the manufacturer directly for information on proper fitting components.

6.3 Hose and Fitting Compatibility – Care must be taken to determine proper compatibility between the hose and fitting. Base selection on the manufacturers' recommendations substantiated by testing to industry standards such as SAE J517. Hose from one manufacturer is not usually compatible with fittings from another. Do not intermix hose and fittings from two manufacturers without approval from both manufacturers

6.4 Hose Assembly Equipment – Assembly equipment from one manufacturer is usually not interchangeable with that from another manufacturer. Hoses and fittings from one manufacturer should not generally be assembled with the equipment of another manufacturer.

6.5 Safety Equipment – During fabrication, use proper safety equipment, including eye protection, breathing apparatus, and adequate ventilation.

6.6 Reuse of Hose and Fittings – When fabricating hose assemblies, do not reuse:
A. Field-attachable fittings that have blown or pulled off hose.
B. Any part of hose fittings that were permanently crimped or swaged to hose.
C. Hose that has been in service after system check out (see 7.7).

6.7 Cleanliness of Hose Assemblies – Hose assemblies may be contaminated during fabrication. Clean hoses to specified cleanliness levels

7. Hose Installation and Replacement
Use the following practices when installing hose assemblies in new systems or replacing hose assemblies in existing systems:

7.1 Pre-Installation Inspection – Before installing hose assemblies, examine:
A. Hose length and routing for compliance with original design.
B. Assemblies for correct style, size, length and visible nonconformities.
C. Fitting sealing surfaces for burrs, nicks, or other damage.
NOTE: When replacing hose assemblies in existing systems, verify that the replacement is of equal quality to the original assembly.

7.2 Handling During Installation – Handle hose with care during installation. Kinking hose, or bending at less than minimum bend radius may reduce hose life. Avoid sharp bending at the hose/fitting juncture (see 5.21).

7.3 Twist Angle and Orientation – Pressure applied to a twisted hose may shorten the life of the hose or loosen the connections. To avoid twisting, use the hose lay line or marking as a reference (see zFigure 8).

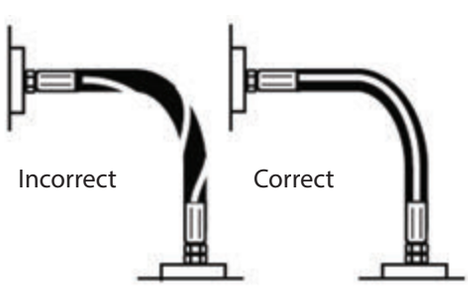

Figure 8. Twist Angle and Orientation

7.4 Securement and Protection – Install necessary restraints and protective devices. Determine that such devices do not create additional stress or wear points.

7.5 Routing – Review proper routing practices provided in Section 5 and make appropriate corrections to obtain optimum performance.

7.6 Assembly Torque – The connection end of a hose is normally threaded to obtain a tight pressure seal when attached to a port, an adapter, or another fitting. Sometimes bolts or screws provide the threaded connection. Each size and type of connection requires different torque values, and these may vary due to type of material or exterior coating.

7.7 System Checkouts – In hydraulic or other liquid systems, eliminate all air entrapment after completing the installation. Follow manufacturers' instructions to test the system for possible malfunctions and leaks.

7.7.1 To avoid injury during system checkouts:
A. Do not touch any part of the system when checking for leaks (see 4.1).
B. Stay out of potentially hazardous areas while testing hose systems (see Section 4).
C. Relieve system pressure before tightening connections.

8. Maintenance Inspection
A hose and fittingmaintenance program may reduce equipment downtime, maintain peak operating performance, and reduce the risk of personal injury and/or property damage. The user should design and implement a maintenance program that suits the specific application and each specific hose in that application.

8.1 Inspection Frequency – Evaluate factors such as the nature and severity of the application, past history, and manufacturers information to establish the frequency of visual inspections and functional tests.

8.2 Visual Inspection (Hose and Fittings) –
Visually inspect hose and fittings for:
A. Leaks at hose fitting or in hose.
B. Damaged, cut or abraded cover.
C. Exposed reinforcement.
D. Kinked, crushed, flattened, or twisted hose.
E. Hard, stiff, heat cracked, or charred hose.
F. Blistered, soft, degraded, or loose cover.
G. Cracked, damaged, or badly corroded fittings.
H. Fitting slippage on hose.
I. Other signs of significant deterioration. If any of these conditions exist, evaluate the hose assemblies for correction or replacement.

8.3 Visual Inspection (All Other Components) – When visually inspecting hose and fittings, inspect for related items including:
A. Leaking ports.
B. Damaged or missing hose clamps, guards or shields.
C. Excessive dirt and debris around hose.
D. System fluid: Level, type, contamination, condition and air entrainment. If any of these are found, address them appropriately.

8.4 Functional Test – Functional tests determine if systems are leak free and operating properly. Carry out functional tests per information from equipmentmanufacturers.

9. Hose Storage
Age control and the manner of storage can affect hose life. Use the following practices when storing hose.

9.1 Age Control – Maintain a system of age control to determine that hose is used before its shelf life has expired. Shelf life is the period of time when it is reasonable to expect the hose to retain full capabilities for rendering the intended service. Store hose in a manner that facilitates age control and first-in, first-out usage based on manufacturing date on hose or hose assembly. Per SAE J517:
A. Shelf life of rubber hose in bulk form, or in hose assemblies passing visual inspection and proof test, is forty quarters (ten years) from the date of vulcanization.
B. Shelf life of thermoplastic and polytetrafluoroethylene hose is considered to be unlimited.

9.2 Storage – Store hose and hose assemblies in a cool, dark, dry area with the ends capped. When storing hose, take care to avoid damage that could reduce hose life, and follow the manufacturers' information for storage and shelf life.
Examples of factors that can adversely affect hose product in storage are:
A. Temperature
B. Ozone
C. Oils
D. Corrosive liquids and fumes
E. Rodents
F. Humidity
G. Ultraviolet light
H. Solvents
I. Insects
J. Radioactive materials

If there are any questions regarding the quality or usability of hose or hose assemblies, evaluate appropriately:
A. Flex the hose to the minimum bend radius and compare it with new hose. After flexing, examine the cover and tube for cracks. If any appear, no matter how small, reject the hose.

B. If the hose is wire reinforced, and the hose is unusually stiff, or a cracking sound is heard during flexing, check for rust by cutting away a section of the cover from a sample. Rust would be another reason for rejection.

C. If doubt still persists, contact hose assembler to conduct proof-pressure tests or any other tests needed to verify hose quality. Prepared by the SAE Fluid Conductors and Connectors Technical Committee SC3–Training and Education Subcommittee

Selection of Hose Diameter from Flow Rate and Velocity

The Fluid Velocity Nomogram gives the velocity of a liquid or gas as a function of flow rate and inside diameter of the fluid line. The commonly recommended maximum velocities for hydraulic oil systems at 200°F or less are indicated for guidance.

Example: At 10 gpm, what is the minimum size within the recommended velocity range for a hydraulic pressure line?
The dashed line drawn from the 10 gpm mark on the left hand line to the maximum velocity of 20 fps intersects the middle line at .438 " (7/16" I. D. hose or tubing).
For a hose application, use 1/2" I. D., the nearest common standard size.

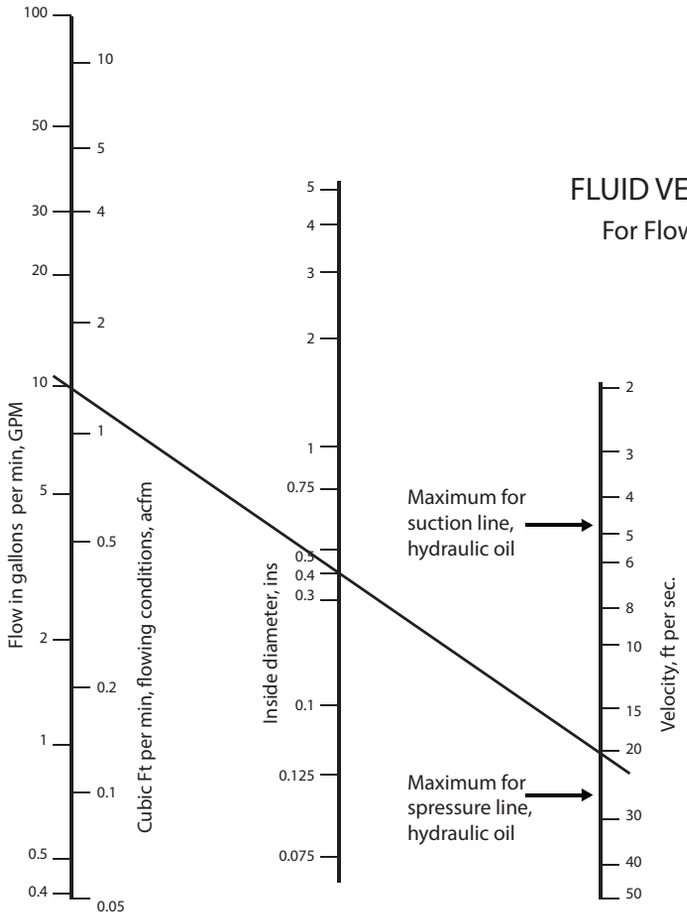
This chart is based on the following formulas: $V_{fps} = \frac{.321Q}{\frac{pd^2}{4}}$

Q = gal per min

d = hose or tube I. D. (inch)

cu. ft./min. = .1337 Q

The cu. ft. per min. value is the actual Volume flow rate under flowing conditions.
For air, standard cfm of free air = 7.81 actual cfm when the inlet air is at 100 PSIg 68°F.



Determination of Pressure Drop in the Line

Velocity: v = $0.409 = \frac{Q}{d^2} = 0.0509 = \frac{W}{pd^2} = \frac{q}{.785d^2}$

Reynold's Number: Re = $124\,{}^{dvp}/_{\mu} = 6.31\,{}^{W}/_{d\mu} = 378\,{}^{qp}/_{d\mu}$

Pressure Drop, Isothermal, Incompressible Flow (Liquids):

$\Delta P = .001\ 294 = \frac{fLpv^2}{d} = .000\ 00336 = \frac{fLW^2}{pd^5} = .0121\ \frac{fL\,q^2}{.d^5}$

Pressure Drop, Isothermal, Compressible, Long Lines (Gases and Vapors):

$$\frac{\Delta P}{P1} = 1 - \sqrt{1 - \frac{fLp\ 1^V 1^2}{12\ g\ d\ P_1}}$$

Symbols and Units for Listed Formulas

d = inside diameter of hose, inches

f = friction coef ficient , dimensionless

g = gravitational constant, 32.2 ft./sec²

P1 = input pressure, PSI

ΔP = pressure difference, PSI

q = rate of ow at owing condition, cu. ft./min.

Q = rate of ow, gals./min.

Re = Reynolds number, dimensionless

v = flow velocity, ft./sec.

W = rate of flow, lbs./hr.

p = weight density offluid, lbs./cu. ft.

μ = absolute (dynamic) viscosity, centipoises
